PART III · SCALES AND KEYS · 1

Counting intervals

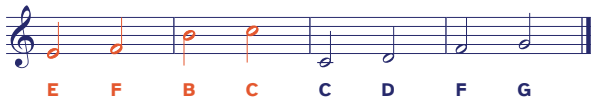

How far apart are two notes? That gap is an **interval**. The very next key is a **semitone**; two make a **tone**. To number it, count the letter names, both ends included.

THE SECRET

Count the letters, both ends included: C to E is a 3rd.

C to E: count the letters, 1 2 3, a 3rd

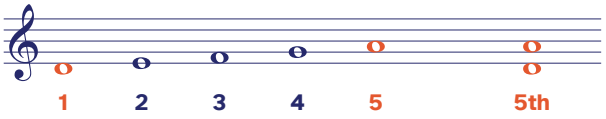

E–F and B–C are semitones; C–D and F–G are tones.

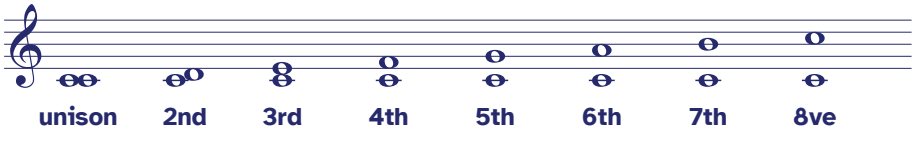

Melodic: one note after the other. Harmonic: together.

Counting the number

From **D** up to **A** (the red notes): D E F G A is five letters, so the interval is a 5th, whether the notes come one after the other or together.

Interval numbers from C

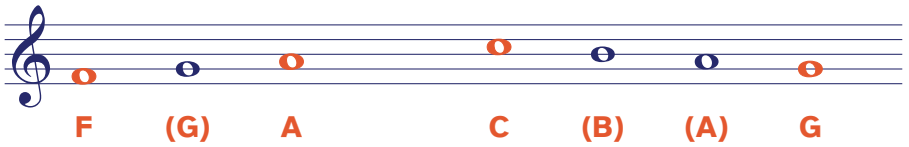

Your hand is a ruler: thumb on C, little finger on G: five fingers on five white keys, a 5th.

PART III · SCALES AND KEYS · 1 · CONTINUED

EXAMPLE

How far apart are these notes?

1. **Call the first note 1:** F is 1.
2. **Count every letter to the second note:** F G A is 3 letters: a 3rd.
3. **Going down works the same:** C B A G is 4 letters: a 4th.

F up to A is a **3rd**; C down to G is a **4th**. Sharps and flats never change the number.

GAME

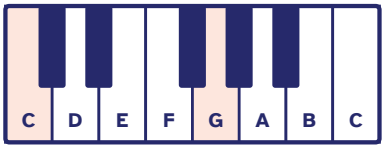

Count the letters

1. C up to G
2. D up to F
3. E up to the next E
4. G up to A

Count every letter, both ends included. What is each interval called?

Answer: 1 a 5th (C D E F G) · 2 a 3rd · 3 an octave (8) · 4 a 2nd.

TRY IT · 10 SECONDS

Thumb on C, finger 5 on G.

Your hand is a ruler: thumb to little finger on white keys is a 5th. Play it, then thumb to finger 3: a 3rd.

YOU KNOW THIS

Twinkle, Twinkle, Little Star

The leap from “twin-” to “kle” is C up to G: C D E F G, **five letters, a 5th**.

Try it. Sing the first two notes of any song, then count the letters between them.

THINK OF IT Monday to Wednesday is three days, not two: you count the day you start on. Intervals count the same way.

TRAP

- × Counting only the gaps, not the notes: always count both ends.
- × Letting a sharp or flat change the number: C to G♯ is still a 5th.

PART III · SCALES AND KEYS · 2

Major, minor and perfect

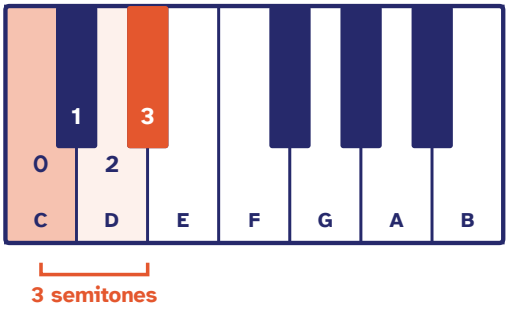

Two intervals with the same number can differ in size. C–E and C–E♭ are both 3rds, but one is a semitone wider. The **quality** (major, minor, perfect…) comes from counting **semitones**.

THE SECRET

Count the semitones: 4 make a major 3rd, 3 a minor 3rd.

From **C** to **E**: count every key, black and white. 4 semitones: a major 3rd.

From **C** to **E♭**: 3 semitones, one fewer: a minor 3rd.

One semitone less: a major 3rd becomes minor

Size in semitones

NUMBER	SMALLER	MAIN	WIDER	FIRST MET
unison		0 (perfect)		Level 1
2nd	1 (minor)	2 (major)		Level 1
3rd	3 (minor)	4 (major)		Level ½
4th		5 (perfect)	6 (augmented)	Level 1
5th	6 (diminished)	7 (perfect)		Level 1
6th	8 (minor)	9 (major)		Level 2
7th	10 (minor)	11 (major)		Level 2
octave		12 (perfect)		Level 1

2nds, 3rds, 6ths, 7ths
diminished ‹ **minor** ‹ **major** ‹ augmented

unisons, 4ths, 5ths, octaves
diminished ‹ **perfect** ‹ augmented

Each step on the ladder is one semitone. Six semitones (an augmented 4th or diminished 5th) is the tritone. Turned upside down, an interval's numbers add to 9 and major and minor swap: a major 3rd becomes a minor 6th.

PART III · SCALES AND KEYS · 2 · CONTINUED

EXAMPLE

Major or minor 3rd?

1. **Count the letters:** C D E is three, so it is a 3rd.
2. **Count the semitones:** C to C♯, D, E♭ is three.
3. **Three semitones** make a minor 3rd; four would be major.

C to E♭: a **minor 3rd**.

GAME

Major or minor 3rd?

1 C–E

2 D–F

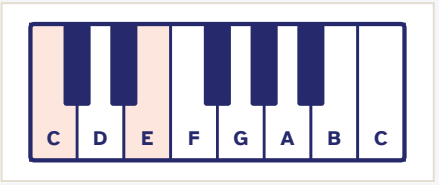

3 F–A

4 E–G

Count the semitones between the two keys: 4 is major, 3 is minor.

Answer: 1 major (4) · 2 minor (3) · 3 major (4) · 4 minor (3).

TRY IT · 10 SECONDS

Play C–E, then C–E♭.

Bright, then dark. One key makes the difference: the major 3rd has four semitones, the minor 3rd three.

YOU KNOW THIS

Beethoven, Symphony No. 5

Da-da-da-DUM: G down to **E♭** is four semitones, a **major 3rd**. Three semitones would be minor.

Try it. Count the keys from G down to E♭: F♯, F, E, E♭.

THINK OF IT A major and a minor 3rd are a smile and a frown: the same face, one small change at the corners.

TRAP

- × Counting white keys only: count every key, black and white.
- × Calling a 4th or 5th “major”: they are perfect.
