PART I

# Pitch

Every note is higher or lower than another. This part starts with the keyboard you can see and touch, moves to the staff where those keys are written, and ends with the families of notes, scales and keys, that whole pieces are built from.

1 **Keyboard** high and low, the patterns › 2 **Staff** lines, spaces and clefs › 3 **Note names** reading every note › 4 **Sharps and flats** the black keys › 5 **Intervals** the distance between notes › 6 **Scales and keys** notes in families

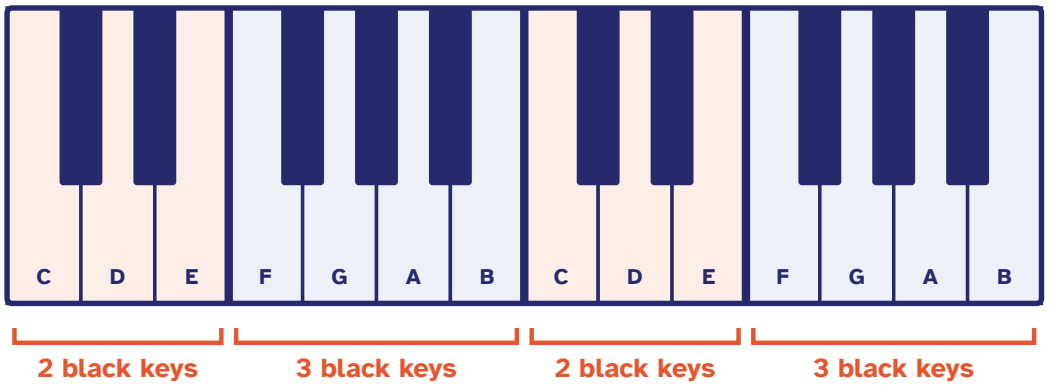

IN THIS PART

PART I · PITCH · 1

# The keyboard

Keys to the **left** sound **lower**; keys to the **right** sound **higher**. The black keys come in groups of **two** and **three**, and that pattern repeats all the way along: it is how you find every note.

## The white keys

Seven letters, **A B C D E F G**, then the letters start again. **C D E** sit around each group of two black keys (C just left of it), **F G A B** around each group of three (F just left of it): the two tints on the picture.

## Middle C and octaves

**Middle C** is the C nearest the middle of the keyboard. From one C to the next is an **octave**: eight white keys, counting both. Octaves are numbered from the bottom: middle C is **C4**, the C below it C3, the C above C5; every key up to the next B shares the number (D4, E4 … B4).

| TERM | MEANING | FIRST MET |
|---|---|---|
| pitch | how high or low a sound is | Level 0 |
| register | a part of the keyboard: low, middle or high | Level 0 |
| semitone | from one key to the very next key, black or white | Level 0 |
| tone | two semitones | Level 0 |
| octave | from one note to the next with the same name (8 white keys, 12 semitones) | Level 0 |

HOW TO

### find any key, for example G4

1. Find middle C (C4): the C just left of the two black keys nearest the middle.
2. Say the letters up from it, one white key each: C D E F G.
3. Still in the same octave, so it is G4. One octave higher is G5.

PART I · PITCH · 2

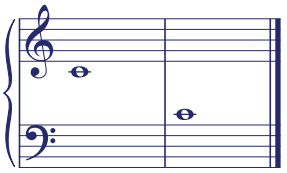

# The staff and the clefs

Music is written on a **staff** (or stave) of five lines and four spaces. Lines and spaces are counted from the **bottom**. Higher notes sit higher on the staff. A **clef** at the start tells you which notes the lines and spaces stand for.

| CLEF | NAME | HOW IT SHOWS ITS NOTE | FIRST MET |
|---|---|---|---|
| 𝄞 | **treble clef** (G clef) | curls round the line for G (line 2) | Level 0 |
| 𝄢 | **bass clef** (F clef) | its two dots sit either side of the line for F (line 4) | Level 0 |
| 𝄡 | **alto clef** (C clef) | its centre marks middle C, on line 3 | Level 2 |

## The grand staff

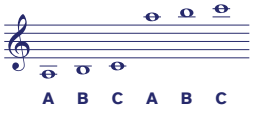

Piano music uses two staves joined by a brace: the treble staff, usually for the right hand, above the bass staff, usually for the left. **Middle C** sits between them on a short line of its own, and can be written in either staff.

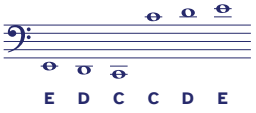

Middle C in the treble staff (left) and in the bass staff (right): the same key.

## Ledger lines

Notes above or below the staff sit on short extra lines called **ledger lines**, spaced exactly like the staff lines. Count on from the staff as if the lines went on.

Treble: A, B, C below; A, B, C above.

Bass: E, D, C below; C, D, E above.

## Octave signs

| SIGN | MEANING | FIRST MET |
|---|---|---|
| **8va** | play an octave higher than written, as far as the dotted line goes | Level ½ |
| **8vb** | play an octave lower | Level ½ |
| **15ma** | play two octaves higher | Level 4 |
| **loco** | back where it is written | Level ½ |

**REMEMBER?** C D E sit around two black keys, F G A B around three. p. 22

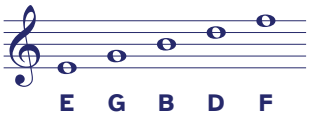

**SEE ALSO**
Reading the notes p. 24 · The staff and the keyboard p. 25

**PRACTISE IT**
Workbook Pitch 2 · Online: Library › Staff and clefs

PART I · PITCH · 3

# Reading the notes

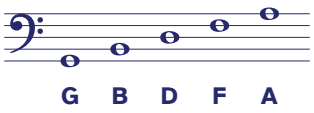

Each line and space has one letter name. Learn them in two ways: by the patterns below, and by a few **landmark notes** you can find instantly and count from.

Treble clef: the lines

Treble clef: the spaces

Bass clef: the lines

Bass clef: the spaces

| STAFF | NOTES, BOTTOM TO TOP | TO REMEMBER |
|---|---|---|
| Treble lines | E G B D F | *Every Good Boy Deserves Fun* |
| Treble spaces | F A C E | spells *FACE* |
| Bass lines | G B D F A | *Great Big Dragon Flies Away* |
| Bass spaces | A C E G | *All Cows Eat Grass* |

## Landmark notes

Find these first; every other note is a **step** (line to the next space, or space to the next line) or a **skip** (line to line, space to space) away.

### Treble clef

Middle C on its ledger line below; the G the clef curls round (line 2); the C in the third space.

### Bass clef

The C in the second space; the F between the clef's dots (line 4); middle C on its ledger line above.

HOW TO

**read a note you are not sure of**

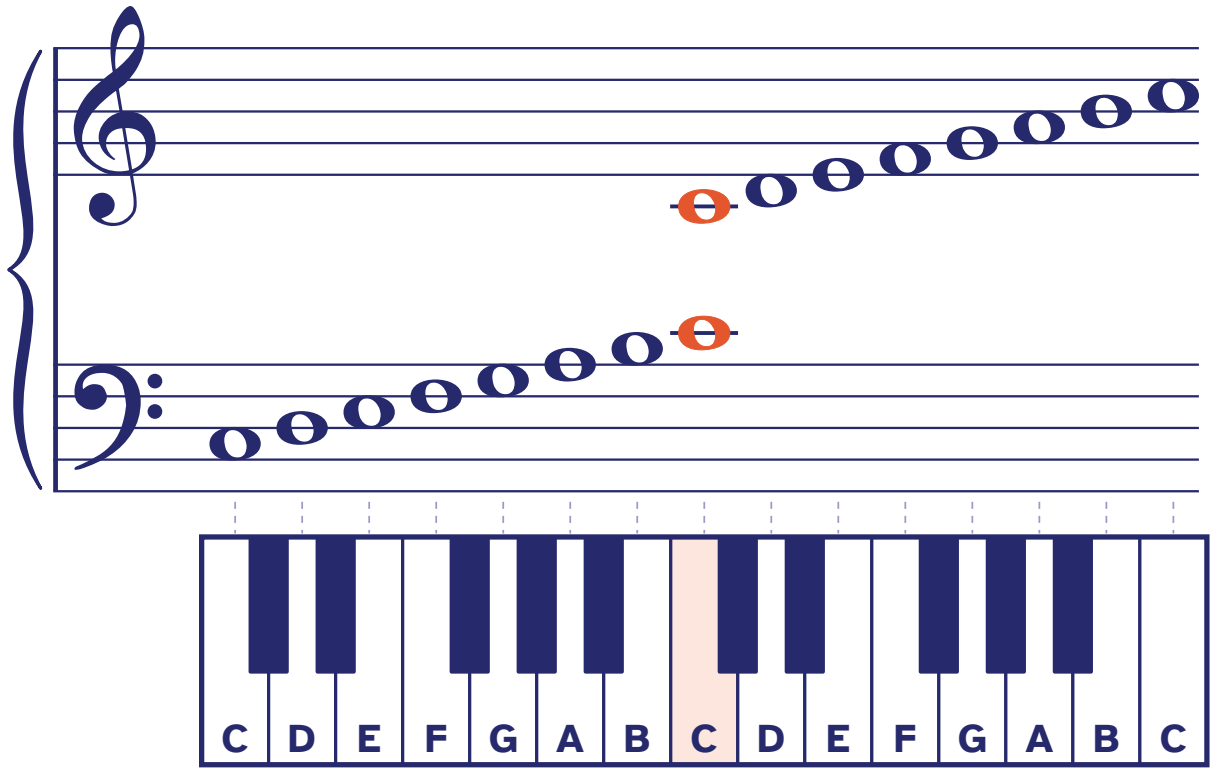

1. Check the clef first.
2. Find the nearest landmark note.
3. Step or skip from it, saying the letters: a skip jumps one letter (G, B), a step goes to the next (G, A).

REMEMBER? Count lines and spaces from the bottom. p. 23
The treble clef marks G (line 2), the bass clef F (line 4). p. 23

PART I · PITCH · 4

# The staff and the keyboard

Every line and space of the grand staff is one white key. Read from left to right, the notes climb the staff exactly as the keys climb the keyboard: two octaves from C3 to C5, with middle C in coral where the two staves meet.

middle C

## What the map shows

Each step up the staff (line to space, space to line) is the next **white** key. The black keys have no line or space of their own: they are written with a sharp or a flat on a white key's line or space (p. 26).

## Two ways to write one key

Middle C can sit on a ledger line below the treble staff or above the bass staff. Both mean the same key; the music chooses the staff of the hand that plays it.

REMEMBER? Middle C is C4. p. 22 Treble lines E G B D F, spaces F A C E. p. 24

PART I · PITCH · 5

# Sharps, flats and naturals

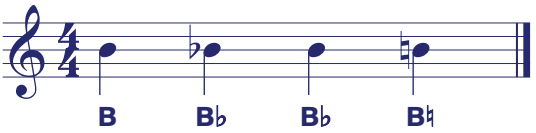

An **accidental** written before a note changes its pitch by a semitone. On the keyboard, a sharp usually means the black key to the right, a flat the black key to the left.

| SIGN | NAME | WHAT IT DOES | FIRST MET |
|---|---|---|---|
| ♯ | sharp | raises a note by a semitone | Level 0 |
| ♭ | flat | lowers a note by a semitone | Level 0 |
| ♮ | natural | cancels a sharp or flat | Level ½ |
| 𝄪 | double sharp | raises by two semitones | Level 4 |
| 𝄫 | double flat | lowers by two semitones | Level 4 |

## An accidental lasts for the bar

The sharp still counts later in the bar; after the bar line, F is F again.

A natural cancels the flat for the rest of the bar.

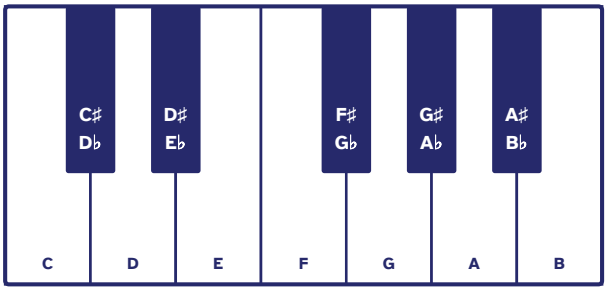

**Only that line or space.** A sharp on the F in the first space does not change the F an octave higher.

**A tie carries it on.** A note tied across the bar line keeps its accidental.

**Reminders.** A courtesy accidental, sometimes in brackets, just reminds you after a bar line.

## One key, two names

Every black key has two names: the key between F and G is both **F♯** and **G♭**. Notes that sound the same but are written differently are **enharmonic**. White keys can have sharp or flat names too: **E♯** is F, **C♭** is B.

REMEMBER? A semitone is the very next key, black or white. p. 22 Every line and space is one white key. p. 25

PART I · PITCH · 6

# Counting intervals

An **interval** is the distance between two notes. A **semitone** is the very next key; a **tone** is two semitones. An interval's **number** comes from counting letter names, both ends included.

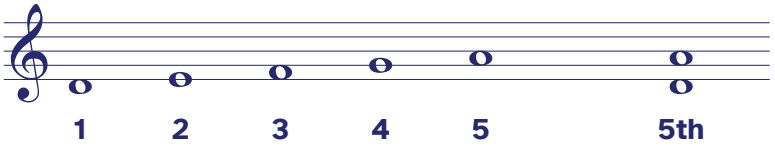

E–F and B–C are semitones; C–D and F–G are tones.

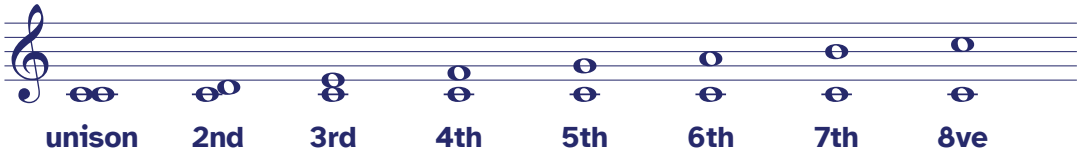

Melodic: one note after the other. Harmonic: together.

## Counting the number

D up to A: D E F G A is five letters, so the interval is a 5th, whether the notes come one after the other or together.

## Interval numbers from C

HOW TO

### name an interval's number

1. Say the lower note's letter as 1.
2. Count up the letters to the higher note: line, space, line …
3. The last number is the interval: the same note is a unison (1), 3 letters a 3rd, 5 letters a 5th, 8 letters an octave. Sharps and flats do not change the number.

REMEMBER? The letters run A to G, then start again. p. 22 A step goes from a line to the next space. p. 24

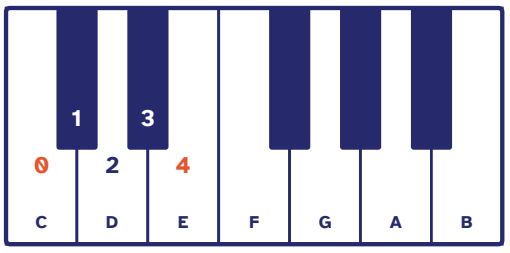

SEE ALSO
Major, minor and perfect p. 28 · Scales p. 29

PRACTISE IT
Workbook Pitch 4 · Online: Library › Intervals

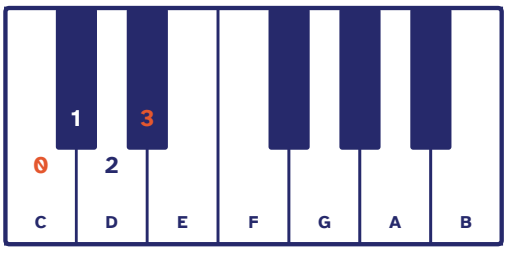

PART I · PITCH · 7

# Major, minor and perfect

Two intervals with the same number can differ in size. C–E and C–E♭ are both 3rds, but one is a semitone wider. The **quality** (major, minor, perfect…) comes from counting **semitones**.

C to E: count every key, black and white. 4 semitones: a major 3rd.

C to E♭: 3 semitones: a minor 3rd.

## Size in semitones

| NUMBER | SMALLER | MAIN | WIDER | FIRST MET |
|---|---|---|---|---|
| unison | 0 | | | Level 1 |
| 2nd | 1 (minor) | 2 (major) | | Level 1 |
| 3rd | 3 (minor) | 4 (major) | | Level ½ |
| 4th | | 5 (perfect) | 6 (augmented) | Level 1 |
| 5th | 6 (diminished) | 7 (perfect) | | Level 1 |
| 6th | 8 (minor) | 9 (major) | | Level 2 |
| 7th | 10 (minor) | 11 (major) | | Level 2 |
| octave | | 12 (perfect) | | Level 1 |

**2nds, 3rds, 6ths, 7ths**
diminished ‹ **minor** ‹ **major** › augmented

**unisons, 4ths, 5ths, octaves**
diminished ‹ **perfect** › augmented

Each step on the ladder is one semitone. Six semitones (an augmented 4th or diminished 5th) is the tritone. Turned upside down, an interval's numbers add to 9 and major and minor swap: a major 3rd becomes a minor 6th.

**REMEMBER?** Count every key, black and white. p. 22 An interval's number comes from counting letters. p. 27

**SEE ALSO**
Counting intervals p. 27 · Chords p. 50

**PRACTISE IT**
Workbook Pitch 4 · Online: Library › Intervals

PART I · PITCH · 8

# Scales

A **scale** is a ladder of notes from one key note up to the next, in a fixed pattern of tones (T) and semitones (S). The pattern, not the starting note, makes a scale major or minor.

C major: T T S T T T S. The semitones fall between 3–4 and 7–8.

| SCALE | STEPS | FIRST MET |
|---|---|---|
| major | T T S T T T S | Level ½ |
| natural minor | T S T T S T T | Level ½ |
| harmonic minor | T S T T S T+S S | Level ½ |
| melodic minor (up) | T S T T T T S; down as the natural minor | Level 2 |
| chromatic | every semitone | Level 2 |
| pentatonic (black keys) | T T T+S T T+S | Level 0 |

## A minor in three forms

Natural: the notes of C major, from A to A.

Harmonic: the 7th raised a semitone (G♯).

Melodic: 6th and 7th raised going up, lowered coming down.

## Degree names

**1** tonic · **2** supertonic · **3** mediant · **4** subdominant · **5** dominant · **6** submediant · **7** leading note

## Minor partners

**Relative**: same signature, 3 semitones lower (C major, A minor). **Parallel**: same key note (C major, C minor).

HOW TO

### build any major scale

1. Write the eight letters from the key note up, every letter once.
2. Check each step against T T S T T T S on the keyboard; add a sharp or flat where a step is wrong. G major: G A B C D E F♯ G.

REMEMBER? A tone is two semitones. p. 22 A sharp raises, a flat lowers. p. 26

PART I · PITCH · 9

# Keys and key signatures

A **key signature** at the start of each line lists the sharps or flats the piece uses throughout, so they do not have to be written before every note. They always appear in the same order.

Sharps: F C G D A E B. The key note is a semitone above the last sharp.

Flats: B E A D G C F. From two flats, the second-last flat names the key.

To remember the order: **F**ather **C**harles **G**oes **D**own **A**nd **E**nds **B**attle; backwards for the flats: **B**attle **E**nds **A**nd **D**own **G**oes **C**harles' **F**ather.

| MAJOR | RELATIVE MINOR | SIGNATURE | FIRST MET |
|---|---|---|---|
| C major | A minor | — | Level ½ |
| G major | E minor | 1♯ | Level ½ |
| D major | B minor | 2♯ | Level 1 |
| A major | F♯ minor | 3♯ | Level 3 |
| E major | C♯ minor | 4♯ | Level 4 |
| B major | G♯ minor | 5♯ | Level 4 |
| F major | D minor | 1♭ | Level ½ |
| B♭ major | G minor | 2♭ | Level 1 |
| E♭ major | C minor | 3♭ | Level 3 |
| A♭ major | F minor | 4♭ | Level 4 |
| D♭ major | B♭ minor | 5♭ | Level 4 |

Six and seven sharps or flats (F♯, C♯, G♭, C♭ major and their minors) come at Levels 4–6.

HOW TO

### find the key of a piece

1. Read the key signature: it gives two keys, a major and its relative minor.
2. Look at the last bass note: it is usually the key note.
3. Look for the raised 7th of the minor (G♯ in A minor): if it keeps appearing, the piece is minor.

REMEMBER? Major scale: T T S T T T S. p. 29 The relative minor is three semitones lower. p. 29

SEE ALSO

Scales p. 29 · The circle of fifths p. 31

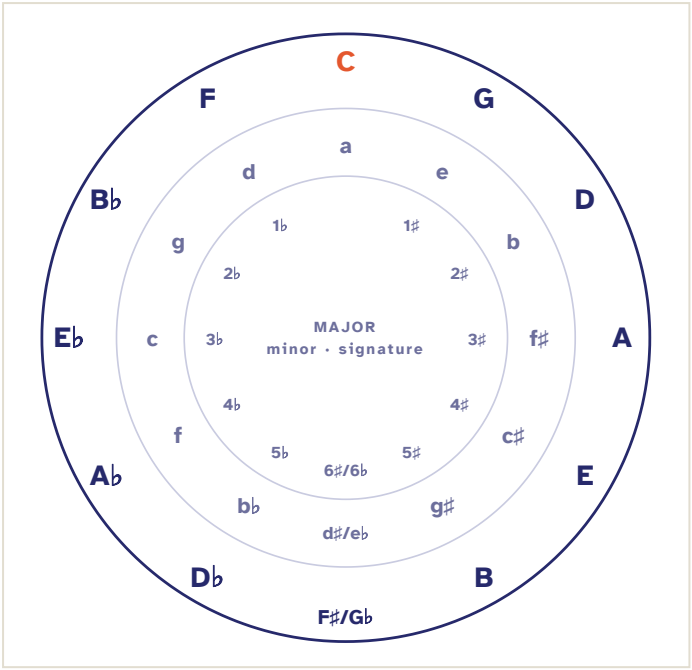

PRACTISE IT

Workbook Pitch 5 · Online: Scale finder, Library › Keys

PART I · PITCH · 10

# The circle of fifths

All the keys on one clock face. Going round clockwise, each key is a **5th higher** than the last and has **one more sharp** (or one fewer flat). Anticlockwise, each is a 4th higher, a 5th lower, with one more flat.

## Reading the circle

**Outer ring:** major keys. **Middle ring:** their relative minors (small letters). **Inner ring:** the key signature.

## Neighbours are close

Keys next to each other share all but one note, so music moves between them easily: from C major to G major or F major, or to the relative minor. These are the **related keys**.

## At the bottom

Six sharps and six flats meet: F♯ major and G♭ major are the same keys on the piano, written two ways.

HOW TO

### use the circle

1. To find a key signature: count the steps from C, clockwise for sharps, anticlockwise for flats.
2. To find related keys: look one step either side, and straight in for the relative minor.
3. To practise scales in a smart order: go round the circle, one new sharp or flat at a time.

**REMEMBER?** A 5th is five letters, seven semitones. p. 27–28 Sharps in order: F C G D A E B. p. 30

PART II

# Time

Music moves through time. Underneath it runs a steady **pulse**; the pulse is grouped into **bars**; and every note and rest takes a measured share of it. This part goes from that big picture down to the length of a single note.

| 1 | | 2 | | 3 | | 4 | | 5 |
|---|---|---|---|---|---|---|---|---|
| **Pulse** the steady beat underneath | › | **Bar** beats in groups of 2, 3 or 4 | › | **Time signature** how many beats, and which note is one beat | › | **Note values** how long each sound lasts | › | **Rhythm** the pattern of long and short |

IN THIS PART

Pulse, tempo and the bar ..... 36
Notes and rests ..... 37
How long is a note? ..... 38
Time signatures ..... 39
Compound and irregular time ..... 40
Rhythm: groups and upbeats ..... 41
Rhythm: off the beat ..... 42

PART II · TIME · 1

# Pulse, tempo and the bar

Under almost every piece runs a **pulse**: a steady beat, like a heartbeat or a clock. Its speed is the **tempo**. Beats are grouped into **bars**, and the first beat of every bar is the strongest.

## Tempo

Tempo is measured in beats per minute. A **metronome mark** at the top of the music shows it: ♩ **= 60** means 60 crotchet beats a minute, one beat a second. ♩ **= 120** is twice as fast. Tempo words such as *Andante* and *Allegro* are on page 70.

## Strong and weak beats

| BEATS | PATTERN | FEELS LIKE |
|---|---|---|
| 2 | **Strong** weak | a march |
| 3 | **Strong** weak weak | a waltz |
| 4 | **Strong** weak **medium** weak | most songs |

## Bars and bar lines

| SIGN | NAME | MEANING |
|---|---|---|
| | bar line | divides the music into bars |
| | double bar line | marks the end of a section, or a change of key, time signature or tempo |
| | final bar line | marks the end of the piece |
| | repeat signs | play the passage between them again; if there is no start sign, go back to the beginning |

## Counting

Three bars of 3/4. Every beat is counted, even inside a long note: the coral number is where you play, the grey numbers are the beats you hold.

Count aloud at one speed, a little louder on beat 1. With a metronome, start slower than you think and speed up only when the passage is steady.

WATCH OUT

- × Speeding up in the easy bars and slowing down in the hard ones: choose a tempo you can keep in the hardest bar.
- × Counting the notes instead of the beats.

SEE ALSO
Time signatures p. 39 · Tempo words p. 70

PRACTISE IT
Workbook Level 0 · Pulse · Online: Metronome

PART II · TIME · 2

# Notes and rests

A note's shape shows how long it lasts: each plain note lasts **half as long** as the one above it. Every note has a **rest** of the same length, a silence counted just as carefully as a sound.

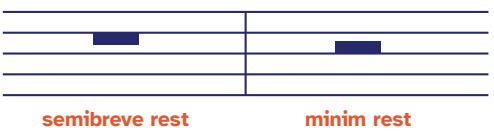

| NOTE | REST | NAME | ALSO CALLED | BEATS* | FIRST MET |
|---|---|---|---|---|---|
|  |  | **breve** | double whole note | **8** | Level 4 |
|  |  | **dotted semibreve** | dotted whole note | **6** | *Extra* |
|  |  | **semibreve** | whole note | **4** | Level 0 |
|  |  | **dotted minim** | dotted half note | **3** | Level 0 |
|  |  | **minim** | half note | **2** | Level 0 |
|  |  | **dotted crotchet** | dotted quarter note | **1½** | Level ½ |
|  |  | **crotchet** | quarter note | **1** | Level 0 |
|  |  | **dotted quaver** | dotted eighth note | **¾** | Level 3 |
|  |  | **quaver** | eighth note | **½** | Level 0 |
|  |  | **semiquaver** | sixteenth note | **¼** | Level 2 |
|  |  | **demisemiquaver** | 32nd note | **⅛** | *Extra* |
|  |  | **hemidemisemiquaver** | 64th note | **1/16** | *Extra* |

* With the crotchet as one beat, as in 2/4, 3/4 and 4/4. *Extra*: beyond Level 8.

## Parts of a note

The **head** sits on a line or in a space. A **stem** goes up on the right of the head or down on the left. **Flags** on the stem halve the value each time; groups of quavers are joined by **beams** instead of flags.

## Which rest is which?

The semibreve rest **hangs** below the fourth line; the minim rest **sits** on the middle line.

**REMEMBER?** Beats are grouped in bars; beat 1 is the strongest. p. 36

PART II · TIME · 3

# How long is a note?

Each row lasts exactly as long as the row above it: the same stretch of time, cut in half again and again.

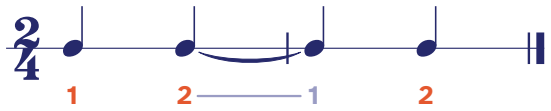

## The dot

A dot adds **half the note's value**: a dotted minim lasts 2 + 1 = 3 beats; a dotted crotchet 1 + ½ = 1½. A **double dot** adds half, then a quarter: a double-dotted minim lasts 2 + 1 + ½ = 3½.

## The tie

A curve joining two notes **of the same pitch** makes one longer sound: play the first, hold through the second. Ties can cross a bar line, where a dot cannot.

TIE OR SLUR?

The same curve over notes of **different** pitches is a **slur**: play them smoothly joined (legato). Same pitch: a tie. Different pitches: a slur.

## Rests in a bar

✓ The silence on beats 3–4 is one minim rest; a whole silent bar takes a semibreve rest, in any time signature.

× In 4/4, a minim rest on beats 2–3 hides the middle of the bar: write two crotchet rests.

REMEMBER? Semibreve 4 beats, minim 2, crotchet 1, quaver ½. p. 37

SEE ALSO
Time signatures p. 39 · Rhythm p. 41

PRACTISE IT
Workbook Level 0 · Note values · Online: Library › Notes and rests

PART II · TIME · 4

# Time signatures

Two numbers at the start of the music. The **top number** says how many counts are in each bar; the **bottom number** says which note gets one count.

## The bottom number

| BOTTOM | NOTE | ONE COUNT IS A | FIRST MET |
|---|---|---|---|
| 2 |  | minim | Level 3 |
| 4 |  | crotchet | Level 0 |
| 8 |  | quaver | Level 1 |
| 16 |  | semiquaver | *Extra* |

**SIMPLE OR COMPOUND?**

In **simple time** each beat divides into **two**. In **compound time** each beat is a dotted note and divides into **three**.

**Quick test:** a top number of 6, 9 or 12 means compound. Divide it by 3 to find the beats: 6/8 has 2, 9/8 has 3, 12/8 has 4.

## Simple time: each beat divides in two

| TIME SIGNATURE | EACH BAR HOLDS | FIRST MET |
|---|---|---|
| 2/4 | 2 crotchets | Level 0 |
| 3/4 | 3 crotchets | Level 0 |
| 4/4 𝄴 | 4 crotchets (the C sign: common time) | Level 0 |
| 2/2 𝄵 | 2 minims (the cut C: cut common time) | Level 3 |
| 3/2 | 3 minims | Level 3 |
| 4/2 | 4 minims | *Extra* |
| 3/8 | 3 quavers | Level 3 |

## Changing time signature

A new time signature can appear in the middle of a piece, right after a bar line; it holds until the next one. A time signature is written only once, not on every line.

**WATCH OUT**

- × Reading 6/8 as six beats: at most speeds it moves in two.
- × Mixing up 3/4 and 6/8: both hold six quavers, grouped differently (page 40).

**REMEMBER?** Beats come in groups of 2, 3 or 4: the bar. p. 36 A crotchet is one count in 4/4. p. 37

**SEE ALSO**

Pulse and the bar p. 36 · Compound time p. 40

**PRACTISE IT**

Workbook Level 0 · Time signatures · Online: Library › Time signatures

PART II · TIME · 5

# Compound and irregular time

Compound time has dotted beats that divide into three; irregular time has five or seven counts, grouped unevenly. (9/4, 12/4 and the /16 signatures exist but are rare.)

## Compound time

| TIME SIGNATURE | EACH BAR HOLDS | FIRST MET |
|---|---|---|
| 6/8 | 2 dotted crotchets | Level 1 |
| 9/8 | 3 dotted crotchets | Level 3 |
| 12/8 | 4 dotted crotchets | Level 3 |
| 6/4 | 2 dotted minims | Level 4 |

## Counting 6/8

Slowly, count all six quavers. At speed, feel two beats, on 1 and 4: “1 & a, 2 & a”.

## 3/4 or 6/8?

3/4: six quavers in three twos

6/8: six quavers in two threes

## Irregular time

| TIME SIGNATURE | EACH BAR HOLDS | FIRST MET |
|---|---|---|
| 5/4 | 5 crotchets: 3 + 2 or 2 + 3 | Level 0 |
| 7/4 | 7 crotchets: 4 + 3 or 3 + 4 | *Extra* |
| 5/8 | 5 quavers: 3 + 2 or 2 + 3 | *Extra* |
| 7/8 | 7 quavers: 2 + 2 + 3 or 3 + 2 + 2 | *Extra* |

**UNEVEN GROUPS IN 4/4**

Many dances keep 4/4 but group the eight quavers 3 + 3 + 2: “1 2 3, 1 2 3, 1 2”.

REMEMBER? A dot adds half the note’s value. p. 38 The top number counts the beats in a bar. p. 39

PART II · TIME · 6

# Rhythm: groups and upbeats

Rhythm is the pattern of long and short sounds over the pulse. The pulse stays steady; the rhythm moves around it. The way notes are grouped on the page shows where the beats are.

## Grouping with beams

Beams join the notes of **one beat**, so the beats stay visible. In 4/4 a beam may cover beats 1–2 or 3–4, but never cross the middle of the bar. In compound time, quavers are beamed in threes.

✓ The middle of the bar can be seen.

× A beam across beats 2–3 hides it.

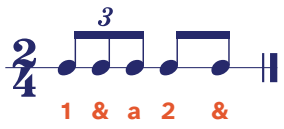

## The upbeat (anacrusis)

A piece can begin **before** the first full bar, with one or more notes called an upbeat or anacrusis. The last bar is then short by the same amount, so the two together make one full bar. Count the missing beats in silence before you start.

Count “1 2” silently, then play on 3.

## Triplets and duplets

Triplet: three notes in the time of two.

Level 2. Three exactly equal notes.

Duplet: two notes in the time of three, in compound time.

Level 2.

## Counting smaller values

Crotchet, two quavers, four semiquavers and a triplet (“1 & a”): one beat each.

REMEMBER? 6/8 has two dotted-crotchet beats. p. 40 Every bar adds up to its time signature. p. 39

PART II · TIME · 7

# Rhythm: off the beat

Once the pulse is secure, rhythm can pull against it. Every one of these effects needs a steady beat underneath.

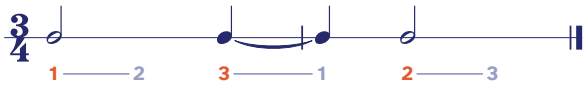

## Syncopation

The crotchet starts on “&” and is held through beat 2.

Level 4. Feel beat 2 even though nothing is played on it.

## Hemiola

Two bars of 3/4 felt as three minims.

Level 4. Common at cadences in Baroque dances.

## Swing Level ½

Common from the first pieces: jazz, blues and many easy modern pieces are marked *swing*. Pairs of quavers are written evenly but played **long–short**, like the first and last notes of a triplet.

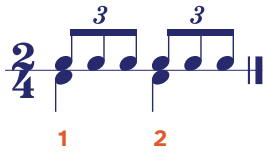

Written

Played

## Polyrhythm Level 7

Three against two: a triplet above, two crotchets below, starting together.

## Rubato Extra

Time is stretched and then given back, for expression: the music leans into a phrase and catches up after it. The pulse always returns. Marked *rubato*, or simply part of the style in much Romantic music.

### WATCH OUT

- × Rushing the short notes after a long one: keep counting inside the long note.
- × Playing a triplet unevenly: three equal notes, not two quick and one long.
- × Letting syncopation drag the pulse: tap the beat with your foot.

REMEMBER? Beams show where the beats are. p. 41 The pulse stays steady underneath. p. 36
