CHAPTER 11 · TONES & SEMITONES (was chapter 7)

v3: the whole chapter, ready to check

After your 12:53 "계속 진행하자", the B answers went as recommended in the v2 pack (B2-B11), and the chapter is now complete: the Lesson Book (final, no yellow marks), the same book on screen, a new drill, a new Workbook and a new Teacher copy. It is in the app on your Mac as one commit, not pushed. Look through it before you push; anything you want changed, I'll change first.

The Lesson Book, 7 pages -- as in v2, with three changes: the yellow marks are gone; page 3's pairs no longer name sharps before page 5 teaches them ("the big house's first and second black keys"); the Korean of page 3 ends with a verb.
On screen -- the book is the lesson, one step a page, like chapters 1-6 and 15. What moves (page 2-6): tap a key and its half steps light up, with the half-step walk from C to C; count the half steps between two keys; white neighbours, whole or half; sharp up, flat down (the names come only on page 5); read the sign and play the key, Queensland and Kingsland.
The drill, 7 levels (B9) -- 1 half step or whole step? (either name is right) · 2 play a half step · 3 play a whole step · 4 white neighbours: E F and B C · 5 name the black keys · 6 one key, two names · 7 sharps and flats on the staff. Levels 5 and 6 never mix sharps and flats in one question, so the sign gives nothing away.
The Workbook, 6 pages (B10) -- set tasks a child can do alone, each page facing its book page: half steps up and down, and counting them; whole steps, up or down as the arrow says, half or whole?; H or W under white neighbours from C and from A, find every E F and B C; both names of each black key, sharp up / flat down, same key or not?; draw the sign, name the sharps and flats, mark the key; and the check-up on paper. On a black key the child fills in a printed circle (a pencil dot does not show on black).
The Teacher copy, 2 pages -- every answer, what to watch for, a line to say when stuck. Words kept out of the student's book are here: *enharmonic* (C♯ = D♭) and *chromatic* (the half-step walk); H/W = S/T for AMEB and the scales chapter.
Out of this chapter (B6, B7): the natural and "a sign lasts until the bar line" (the Accidentals room, 17), E♯ = F and C♭ = B (the scales chapters), double sharps and flats (Grade 4). The old tools for them stay in the Toolbox.

Checked by a second reviewer

A separate reviewer checked every answer in the Workbook, the check-up and the Teacher copy, 4,000 drill questions a level, the Book rules and the Korean. Fixed from its list: two staff notes that were E♯ and C♭ (now D♯ and C♯); sharps named on page 3 before page 5; Teacher-copy numbers matching the Workbook; the staff notes on screen sounding an octave too high; B on the white-neighbours widget; "how many did you circle?" (now "count all the circles, the first one too"); the check-up's last task says what to write; a longer arrow for a whole step; the page 5 puzzle no longer repeats the try-it task ("same key or not?").

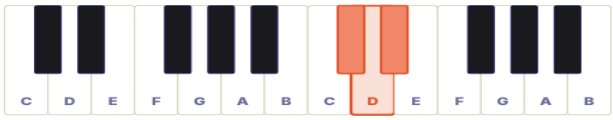

Still waiting on you

G1	For the public guide page: when your students meet tones and semitones, what goes wrong most often? (My guesses: counting the key they start on as a step; calling E F and B C a tone; thinking a black key has one name; the sign after the note.)
G2	The half step / whole step picture is the heart of the chapter. Anything you always say or do with it in a lesson that the page should catch?
G3	One tip for parents: five minutes at home. (My suggestion: the half-step walk from C to C, then naming the black keys both ways.)
K	Korean line breaks inside words (keep-all), app-wide -- still your call.
A8	A double dash "--" can break across two lines in every book. I can glue it to the word before, in every book, in one go.

On screen: what moves

A half step: the very next key

Tap a key to stand on it. Its half steps light up: the very next key up (right) and down (left), black or white.

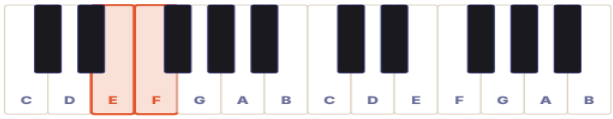

From D: a half step up is the black key on the right, a half step down is the black key on the left.

▶ The half-step walk, C to C

White neighbours

Tap a white key: is the next white key up a whole step or a half step?

E → F: a half step -- no black key between.

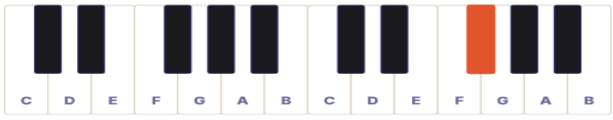

Read the sign, play the key

Tap a note: hear it and see its key. The sign sits just before the note, on its own line or space.

Queensland Kingsland

F♯

Count the half steps

Tap two keys. Count the steps, not the keys: two half steps -- one key in between -- make a whole step.

C → D: 2 half steps = a whole step = a tone

Sharp up, flat down

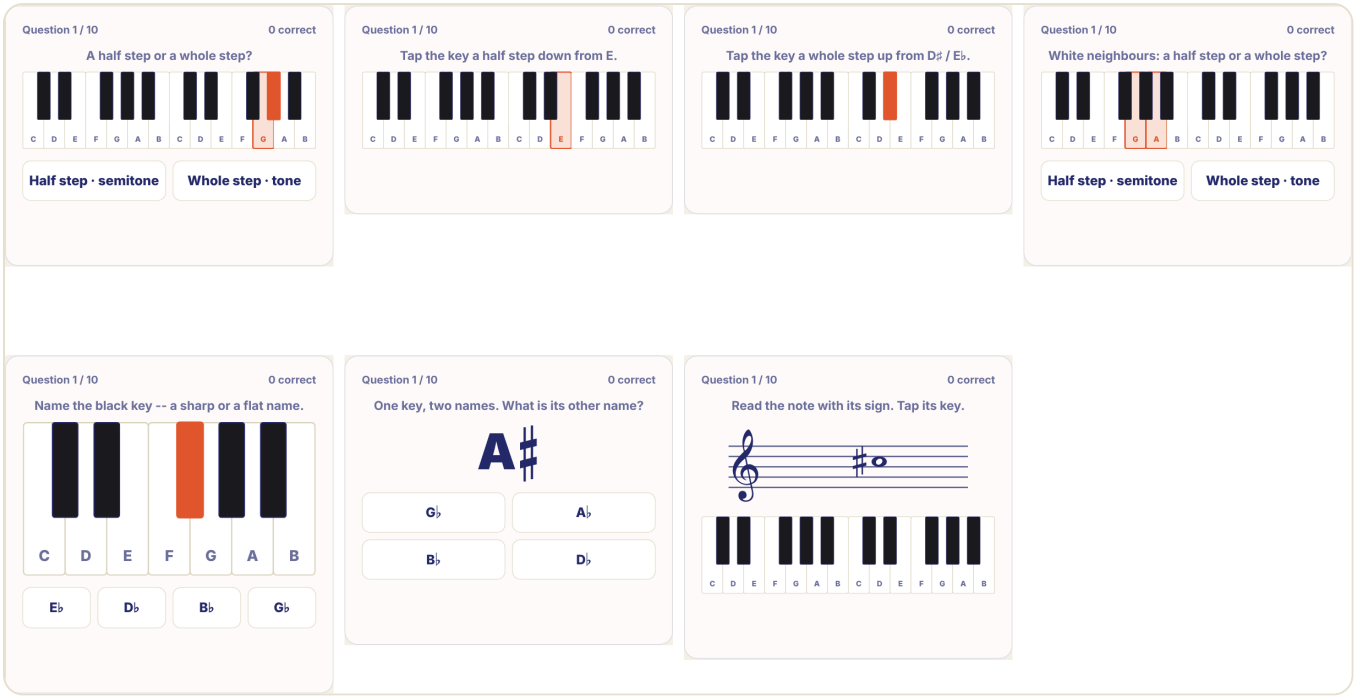

Tap a white key, then tap ♯ up or ♭ down: the sharp moves it a half step up, the flat a half step down.

♯ up ♭ down

C♯ -- a half step up from C, the black key on its right. Its other name: D♭.

The drill: the first question of each level

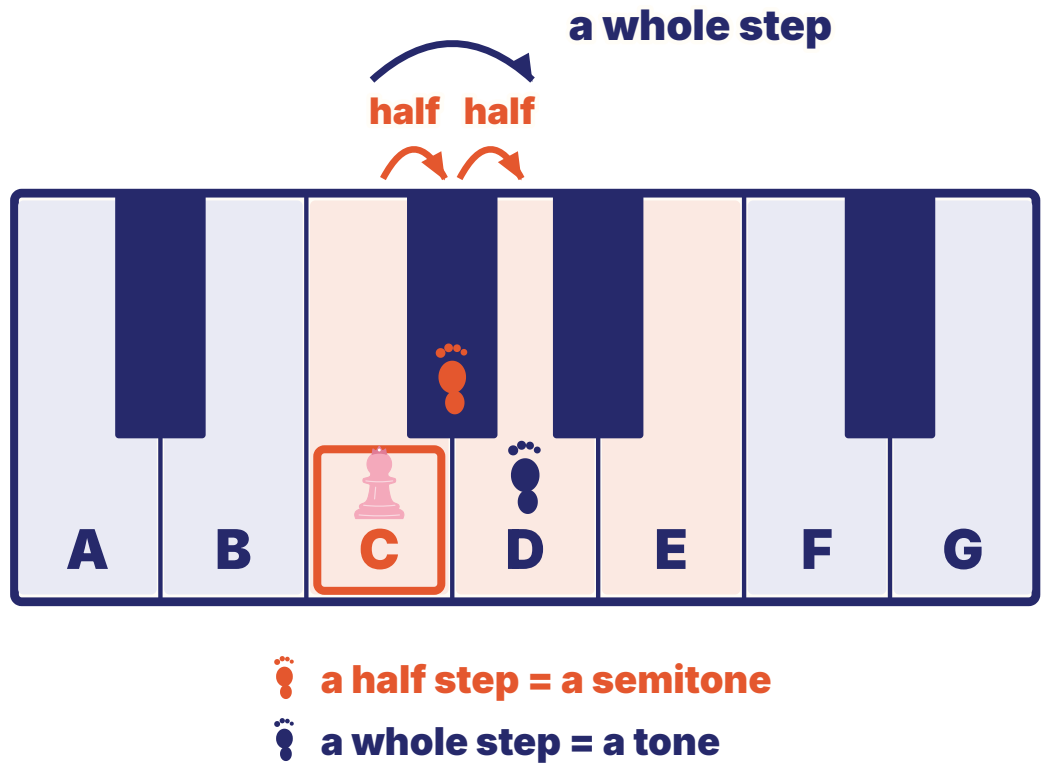

Then: the Lesson Book (7 pages), the Workbook (6 pages) and the Teacher copy (2 pages), as printed.

CHAPTER 11

Tones & Semitones

The names tell you the size. A **semitone** is a **half step** -- to the very next key. A **tone** is a **whole step** -- two half steps. And the black keys get their names: **sharps** and **flats**.

In this chapter

- [ ] A half step: a semitone 2
- [ ] A whole step: a tone 3
- [ ] White half steps 4
- [ ] Sharp and flat 5
- [ ] Sharps and flats on the staff 6
- [ ] My five checks 7

By the end, you can

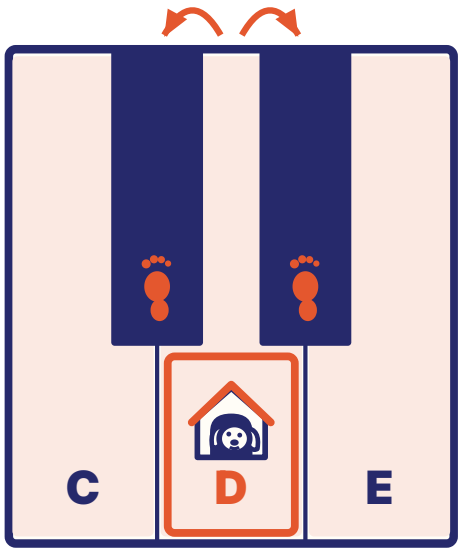

- [ ] play a half step up and down from any key
- [ ] play a whole step up and down from any key
- [ ] show the white half steps: E F and B C
- [ ] name every black key two ways: C♯ = D♭
- [ ] read sharps and flats on the staff and play them

online

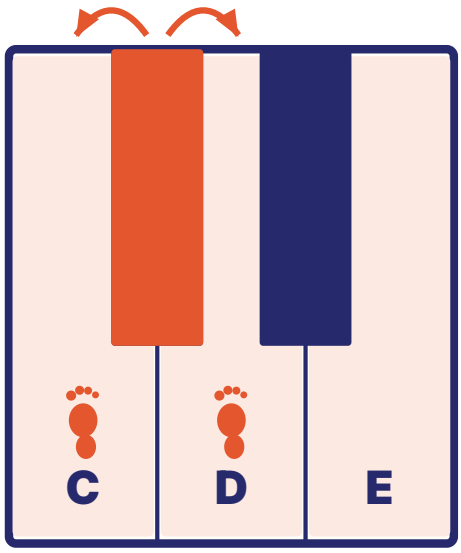

STEP 1

A half step: a semitone

The smallest step on the piano is a **half step**: from a key to the **very next key** -- black or white, nothing in between, as close as a best friend. Its other name is a **semitone** (*semi* means half): Australian and British books say semitone, American books say half step -- the same step. A half step goes up to the right, towards the bird's sky, or down to the left, towards the turtle's sea.

The Dog's half steps:
two black keys

A black key's half steps:
two white keys

At the piano

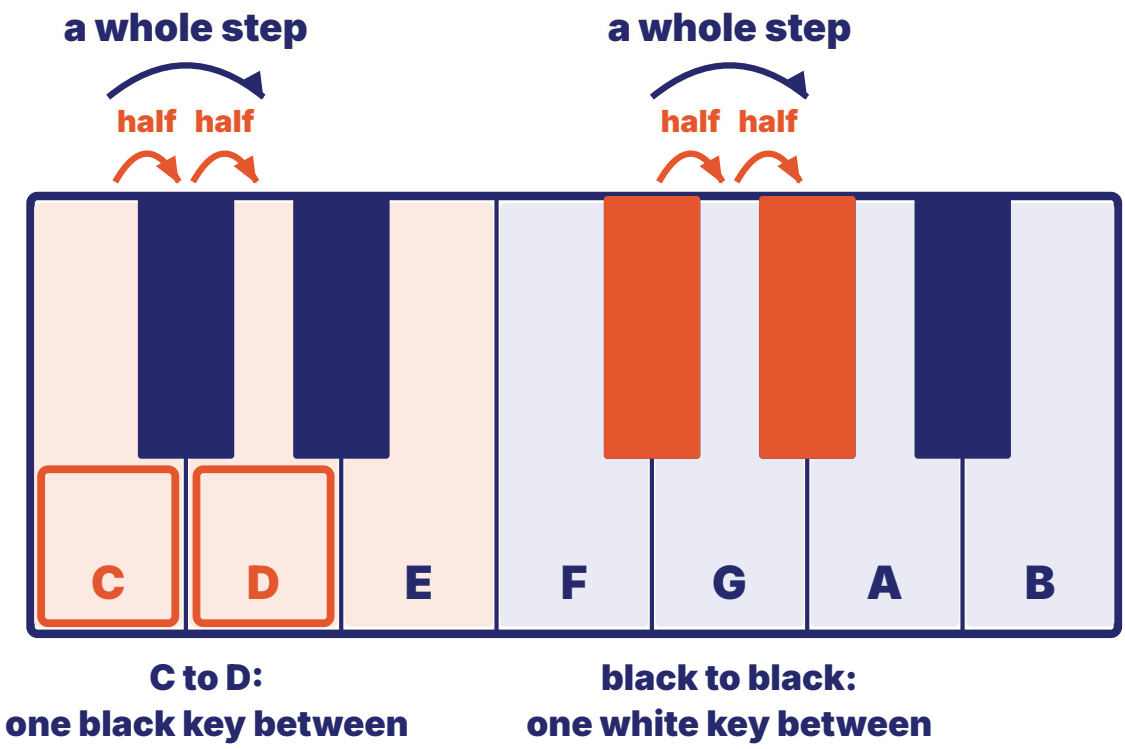

1. Put a finger on D, the Dog. Play a half step up, then a half step down -- both black keys. Say "half step" each time. ☐
2. **The half-step walk:** start on Clara's C and go up a half step, again and again -- every key, black and white -- to the next C. Count the steps, not the keys: 12 half steps. ☐

REMEMBER **A semitone is a half step: the very next key, black or white.**

STEP 2

A whole step: a tone

Two half steps make a **whole step**: **one key** sits in between. Its other name is a **tone**; American books say whole step. From C, step over the black key: D is a whole step up. Black keys too: two black keys with one white key between them are a whole step apart.

At the piano

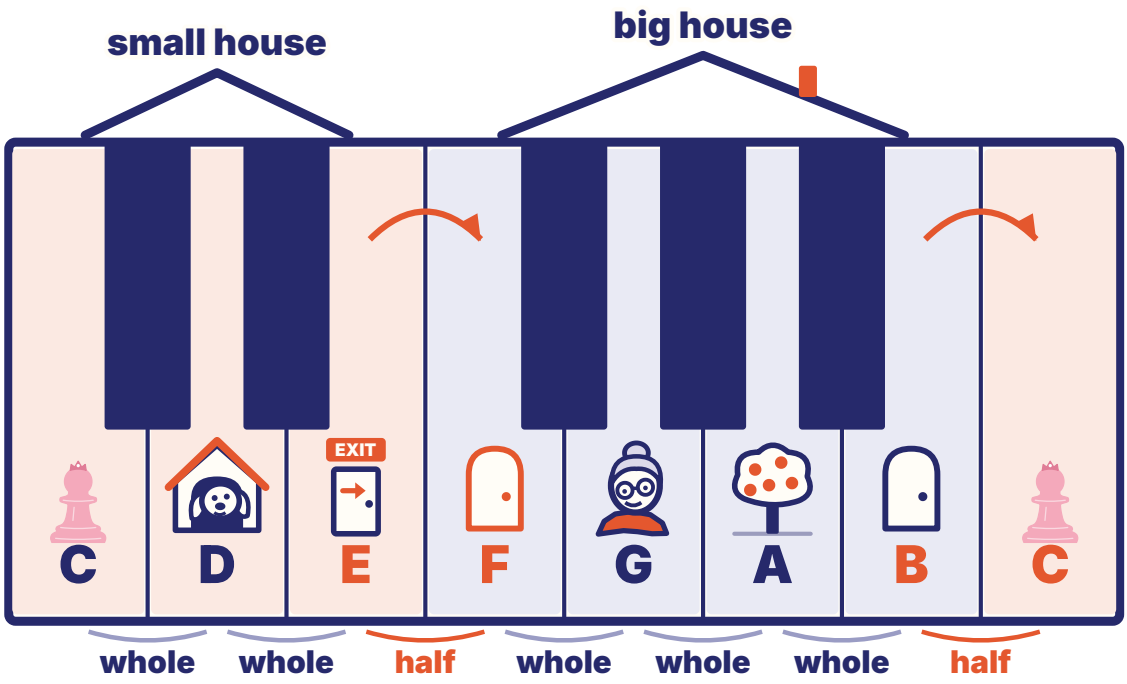

1. From C, play a whole step up: step over the black key and play D. Then play a whole step up from D: E. ☐
2. **Half or whole?** Play each pair and say "half step -- semitone" or "whole step -- tone": C D, E F, B C, F G -- then two black-key pairs: the big house's first and second black keys, and the small house's second black key with E. ☐

REMEMBER **A tone is a whole step: two half steps, one key in between.**

STEP 3

White half steps: E F and B C

Walk the white keys letter by letter (Chapter 4's steps) and look between them. Most letter steps have a black key in between: a **whole step**. But twice there is none. Walk out of the small house's **Exit (E)** and you are at the big house's **Front door (F)**; go out of the big house's **Back door (B)** and there is **Princess Clara (C)** at the next small house. **E F** and **B C** are only a **half step** apart.

At the piano

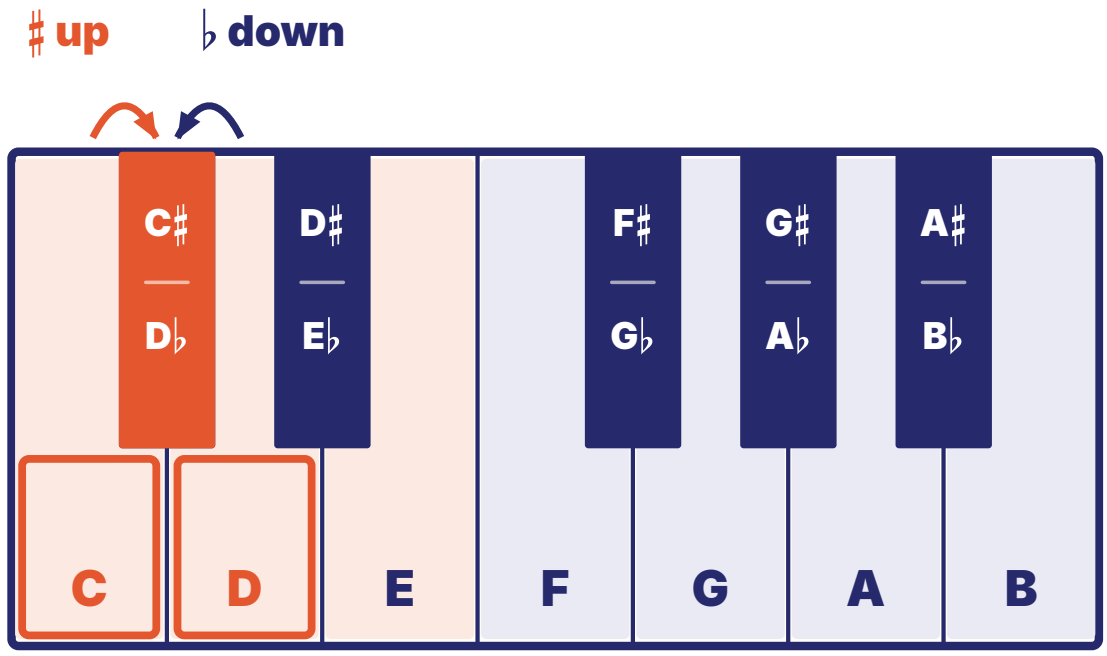

1. Find every E and F on the piano, then every B and C: no black key between them -- a half step. ☐
2. Walk up the white keys from C to the next C, naming each step: whole, whole, **half**, whole, whole, whole, **half**. ☐

REMEMBER **No black key between E F and B C: only a half step.**

STEP 4

Sharp and flat: one key, two names

Now the black keys get their names. The **sharp sign ♯** moves a note **up a half step** -- to the very next key on the right. So the black key just right of C is **C sharp, C♯**. The **flat sign ♭** moves a note **down a half step** -- to the very next key on the left. So the same black key, seen from D, is **D flat, D♭**. One key, two names: a half step up from Clara's C, and a half step down from the Dog's D.

At the piano

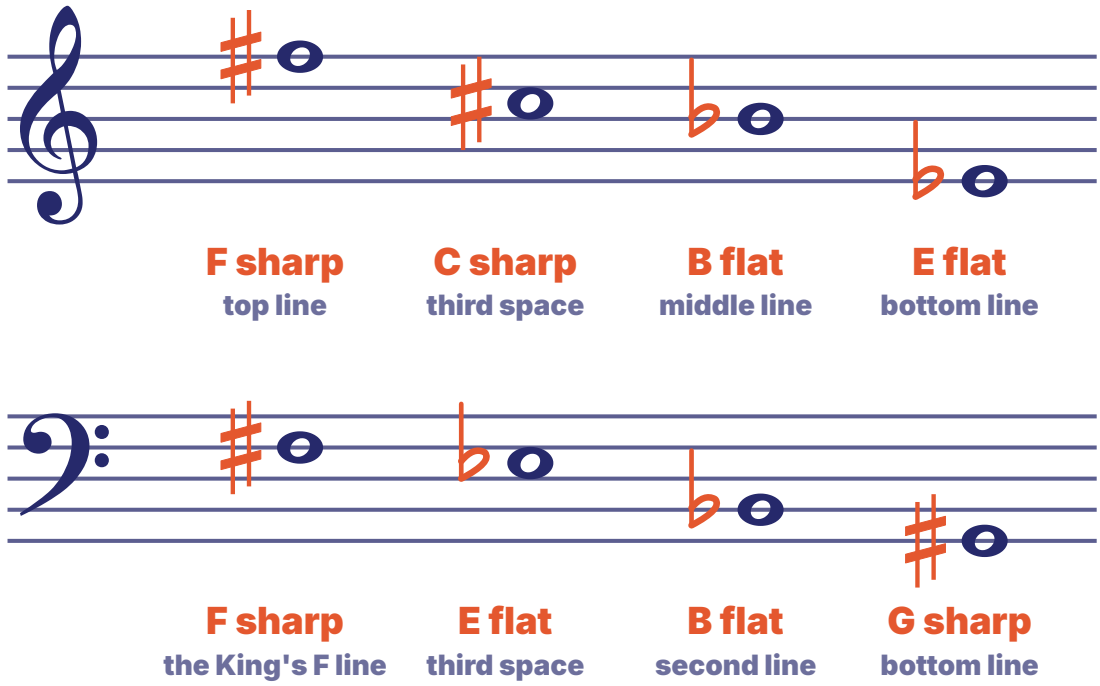

1. Play C, then C♯ -- a half step up. Play D, then D♭ -- a half step down. The same black key! ☐
2. Name every black key both ways: the small house C♯ = D♭, D♯ = E♭; the big house F♯ = G♭, G♯ = A♭, A♯ = B♭. ☐

REMEMBER **♯ up a half step, ♭ down a half step: one black key, two names.**

STEP 5

Sharps and flats on the staff

On the staff, the sign goes **just before the note**, on **the same line or space** as its head: the sharp's little box and the flat's round belly sit right on that line or space. Say the letter first, then the sign: "F sharp", "B flat". Write them the other way round: the sign first, then the note.

At the piano

1. Read and play Queensland's four notes with the right hand: F♯, C♯, B♭, E♭. ☐
2. Read and play Kingsland's four with the left hand: F♯, E♭, B♭, G♯. ☐

REMEMBER **The sign goes just before the note, on the note's own line or space.**

CHECK-UP

My five checks

Show each one at the piano, then tick how it is going -- not yet, nearly, or got it! The check-up on paper is in the Workbook.

At the piano

	NOT YET	NEARLY	GOT IT!
 **I can play a half step (a semitone) up and down from any key**	○	◑	☆
 **I can play a whole step (a tone) up and down from any key**	○	◑	☆
 **I can show the white half steps: E F and B C**	○	◑	☆
 **I can name every black key two ways: C♯ = D♭**	○	◑	☆
 **I can read sharps and flats on the staff and play them**	○	◑	☆

Colour a circle each time it gets better: not yet, then nearly, then got it!

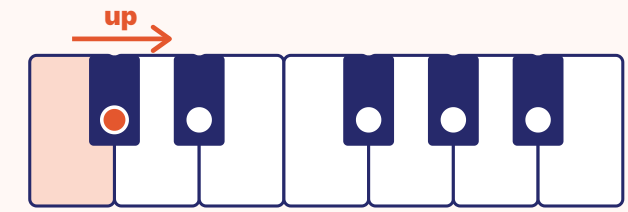

LESSON STEP 1

online

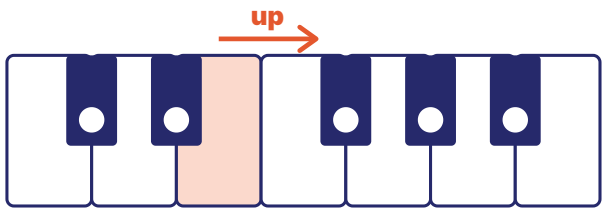

TRY IT A half step up

Your key is in coral. Mark the key a half step up -- the very next key on the right: a dot on a white key, or fill in the circle on a black key.

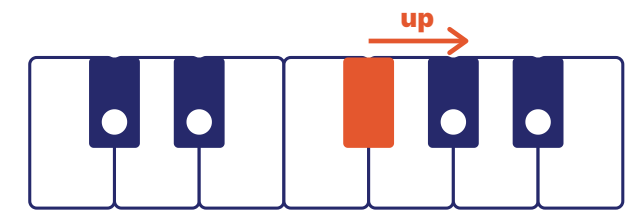

EXAMPLE

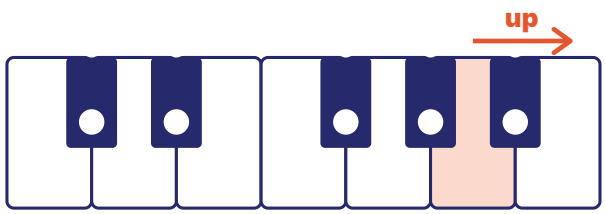

2

3

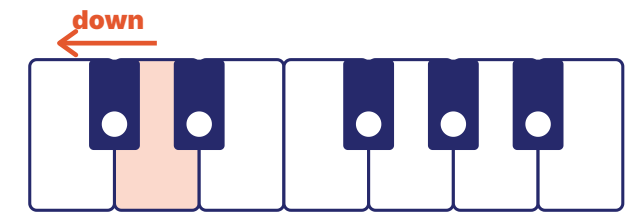

4

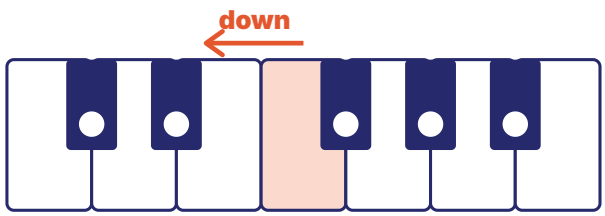

YOUR TURN A half step down

Mark the key a half step down: the very next key on the left.

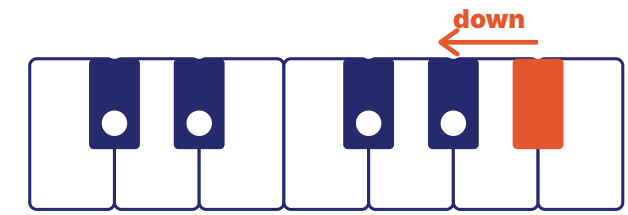

5

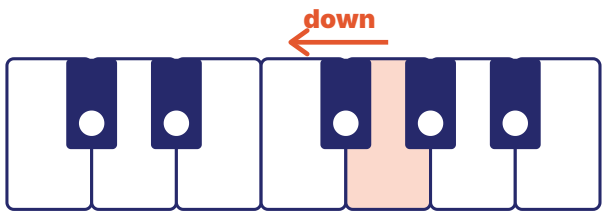

6

7

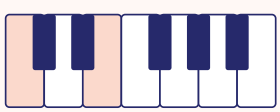

8

★ PLAY Count the half steps

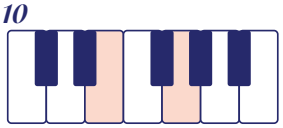

How many half steps from one coral key to the other? Count the steps, not the keys, and write the number.

EXAMPLE

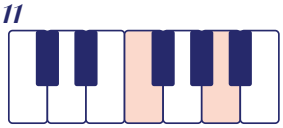

4

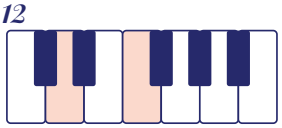

10

11

12

How did it feel? Circle one. ☺ 😐 ☹

CHECKED ☐

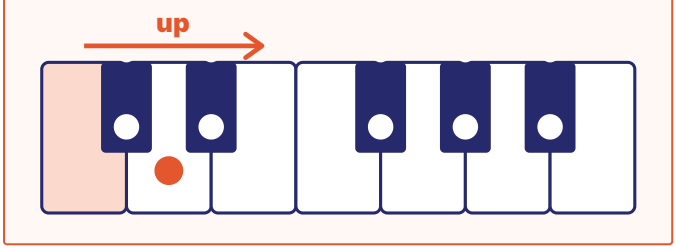

LESSON STEP 2

online

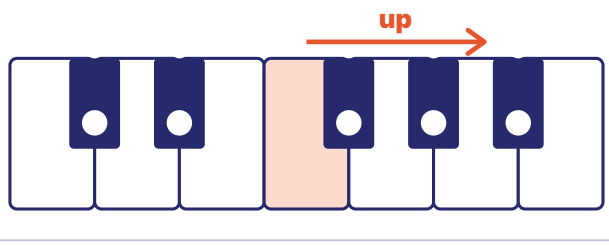

TRY IT A whole step up

Mark the key a whole step up -- two half steps, one key in between: a dot on a white key, or fill in the circle on a black key.

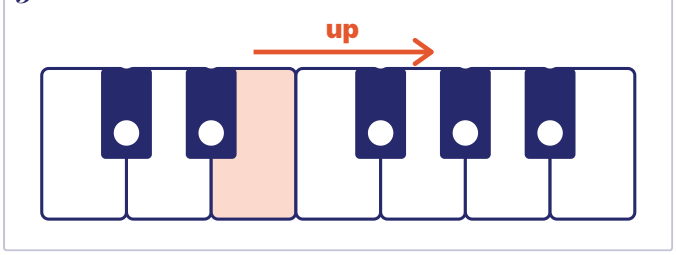

EXAMPLE

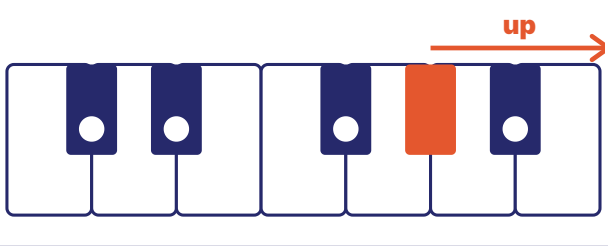

2

3

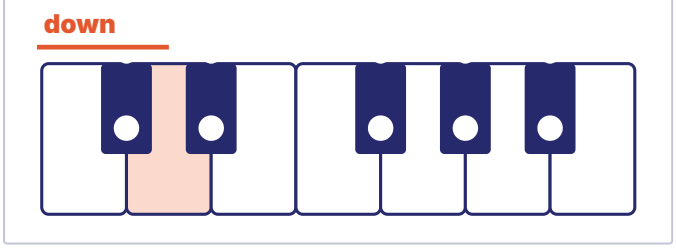

4

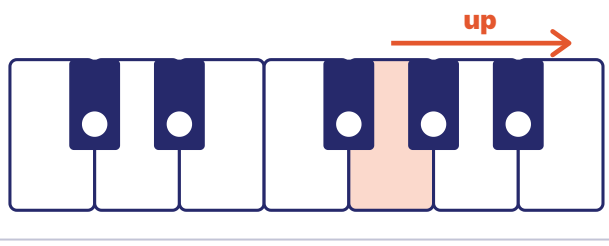

YOUR TURN Up or down?

Go a whole step the way the arrow says, and mark that key.

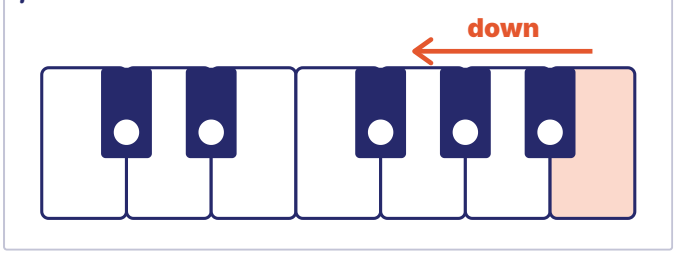

5

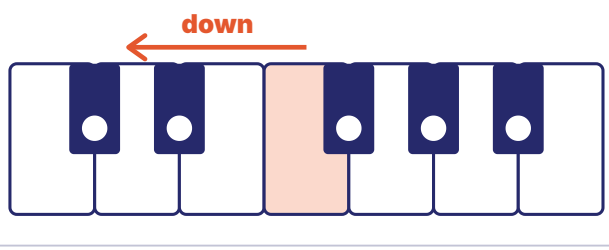

6

7

8

★ PLAY Half or whole?

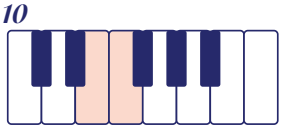

The two coral keys: a half step or a whole step apart? Circle one.

EXAMPLE

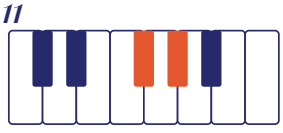

half (whole)

10

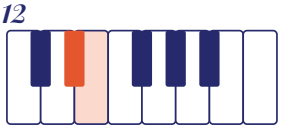

half whole

11

half whole

12

half whole

How did it feel? Circle one. ☺ 😐 ☹

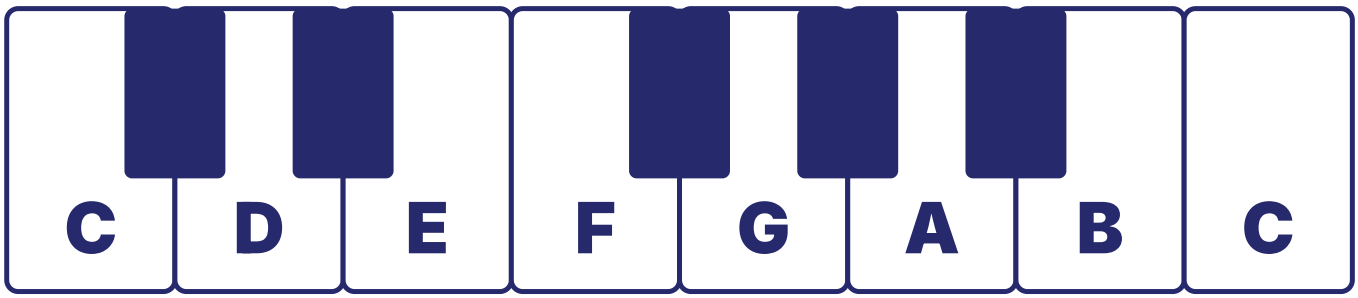

CHECKED ☐

LESSON STEP 3

online

TRY IT H or W, from C to C

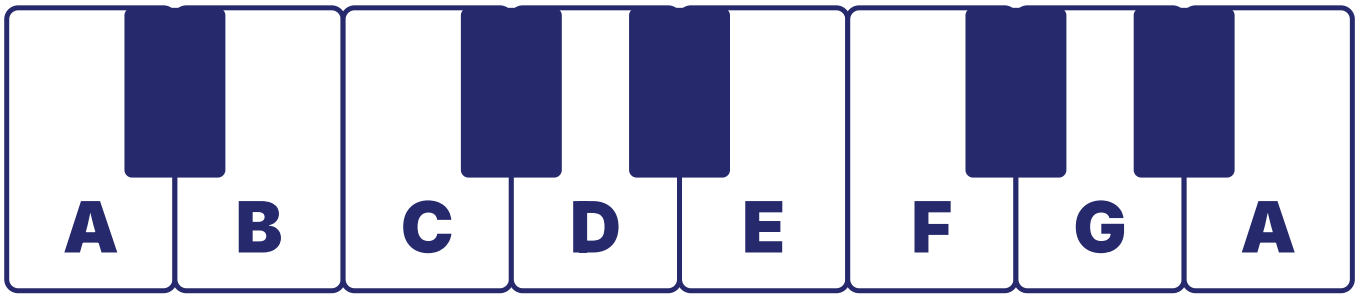

Under each pair of white neighbours, write H for a half step or W for a whole step. Look for the black key between them.

W	2	3	4	5	6	7

YOUR TURN H or W, from A to A

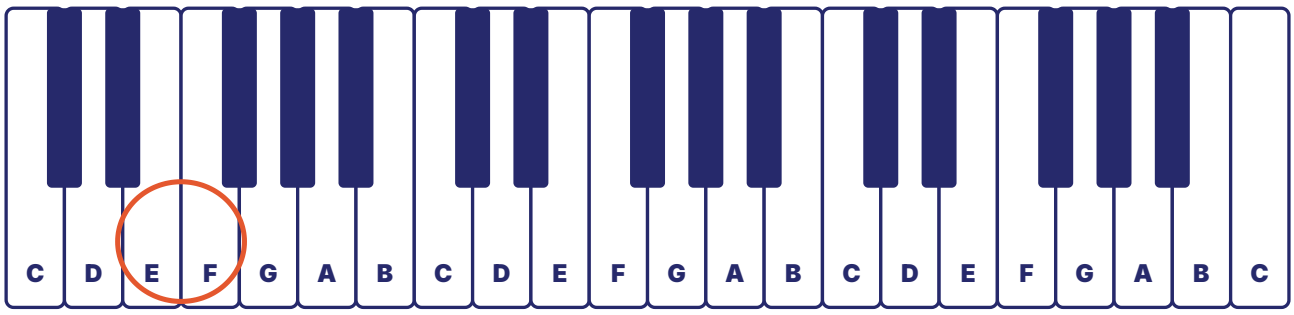

The same from A up to A: H or W under each pair.

8	9	10	11	12	13	14

★ PLAY Find every E F and B C

Circle every E F and every B C on this long piano -- the half steps with no black key between. The first one is done for you.

Count all the circles, the first one too: ☐

How did it feel? Circle one. ☺ 😐 ☹ CHECKED ☐

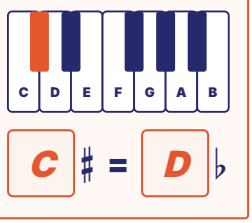

LESSON STEP 4

online

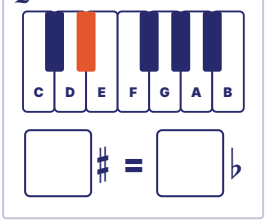

TRY IT Two names for each black key

The coral black key: write its sharp name (the letter on its left) and its flat name (the letter on its right).

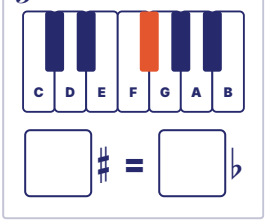

EXAMPLE

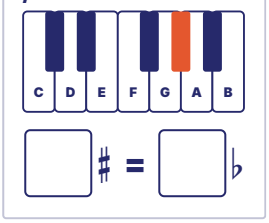

2

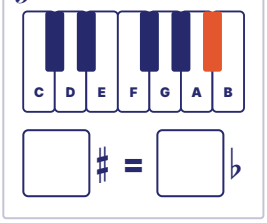

3

4

5

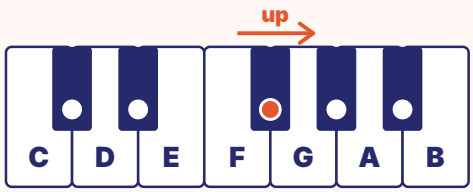

YOUR TURN Sharp up, flat down

Start on the letter. Draw an arrow a half step up for a sharp, or down for a flat, and fill in the circle on the black key you land on.

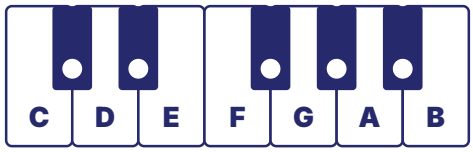

EXAMPLE

F♯

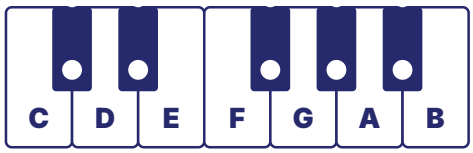

7

B♭

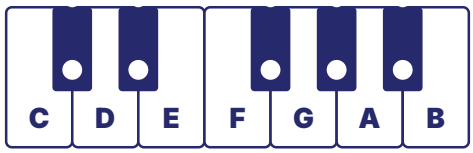

8

D♯

9

A♭

★ PLAY Same key or not?

Are the two names the same black key on the piano? Circle yes or no.

EXAMPLE

C♯ · D♭

(yes) no

11

F♯ · A♭

yes no

12

E♭ · D♯

yes no

13

G♯ · B♭

yes no

14

G♭ · F♯

yes no

15

A♯ · B♭

yes no

16

D♯ · D♭

yes no

17

A♭ · G♯

yes no

How did it feel? Circle one. ☺ 😐 ☹

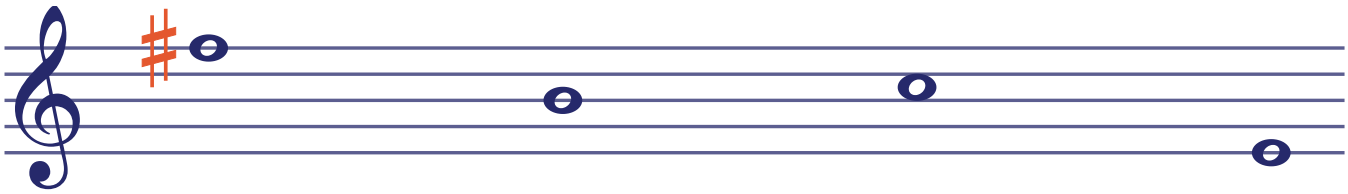

CHECKED ☐

LESSON STEP 5

online

TRY IT Draw the sign

Draw the sign just before each note, on the note's own line or space. Then say its name.

F♯ B♭ C♯ E♭

YOUR TURN Name the sharps and flats

Write each note's name: the letter, then its sign.

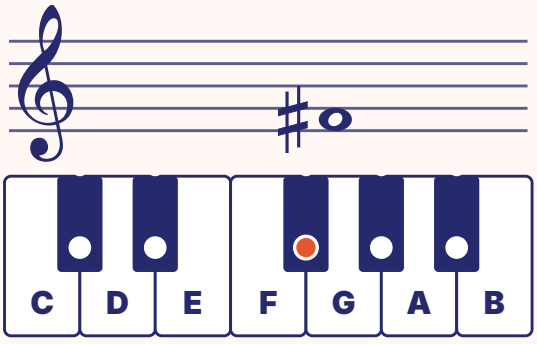

1 2 3 4 5 6 7 8

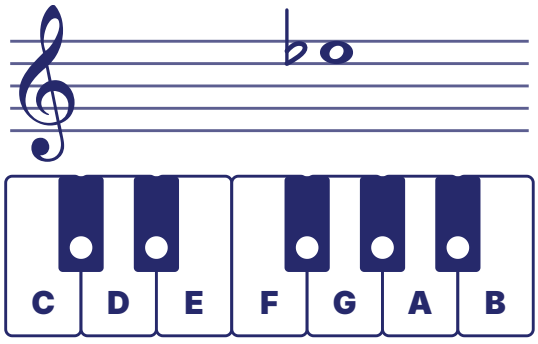

★ PLAY Mark the key

Read the note with its sign, then fill in the circle on its black key.

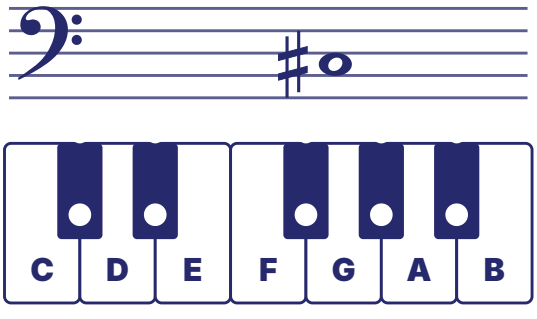

EXAMPLE

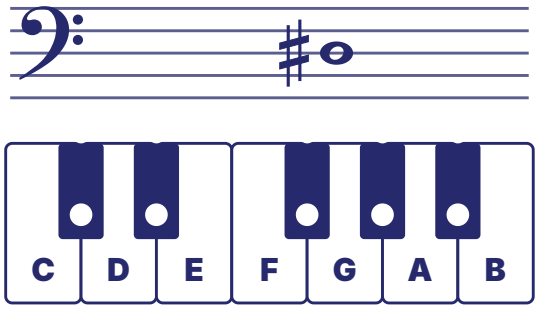

10

11

12

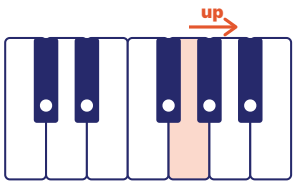

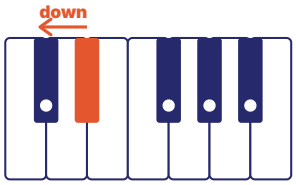

How did it feel? Circle one. ☺ 😐 ☹ CHECKED ☐

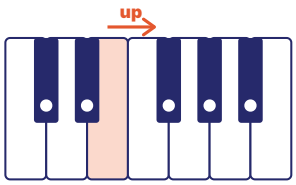

On paper

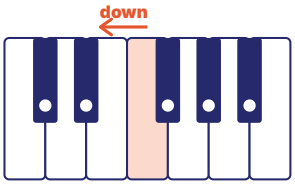

Name _____ Date _____ · no help, no piano · about 10 minutes

A **A half step, the way the arrow says: mark the key (fill in the circle on a black key).**

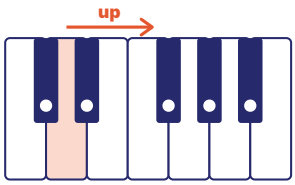

1 

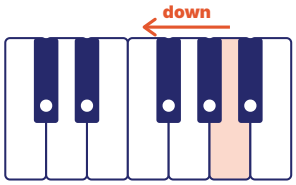

2 

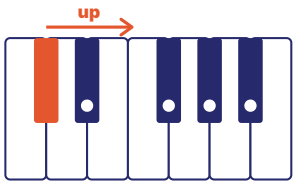

3 

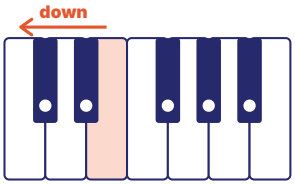

4 

B **A whole step, the way the arrow says: mark the key.**

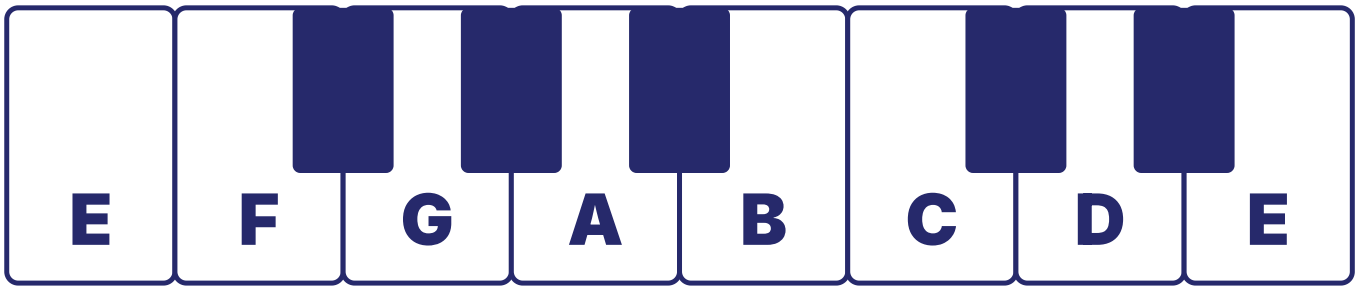

5 

6 

7 

8 

C **From E up to E: write H or W under each pair of white neighbours.**

9 ☐ 10 ☐ 11 ☐ 12 ☐ 13 ☐ 14 ☐ 15 ☐

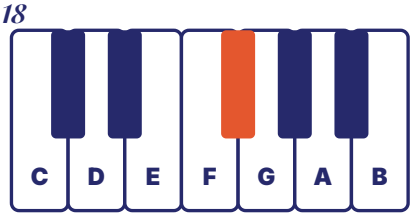

D **Write both names of each coral black key.**

16 

☐ ♯ = ☐ ♭

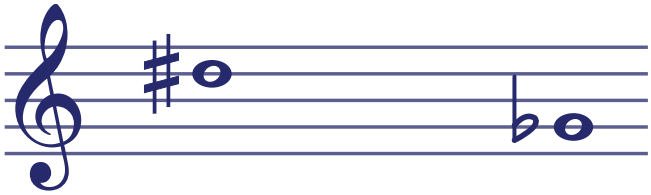

17 

☐ ♯ = ☐ ♭

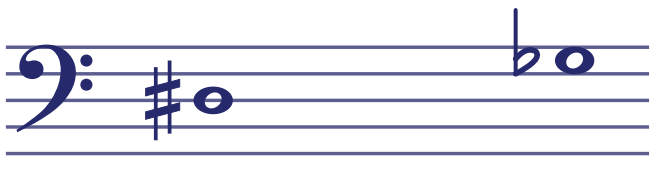

18 

☐ ♯ = ☐ ♭

E **Write each note's name: the letter, then its sign.**

19 ☐ 20 ☐

21 ☐ 22 ☐

Teacher copy · Tones & Semitones

Answers for every workbook page, the mistakes students make most, and a line to say when they get stuck. The book teaches both pairs of names: semitone and tone (Australian and British books, AMEB), half step and whole step (American books); either is right. One black key with two names is **enharmonic** (C♯ = D♭) -- a Music Craft Grade 1 word, said here, not in the student's book. The half-step walk from C to C is the **chromatic scale** (Piano for Leisure Grade 1 plays it hands separately). Left for later: the natural sign and "a sign lasts until the bar line" (the Accidentals room), E♯ = F and C♭ = B (the scales chapters), double sharps and flats (Grade 4).

p. 2 A half step: a semitone

TRY IT 1. **C → C♯ / D♭** 2. **E → F** 3. **F♯ / G♭ → G** 4. **A → A♯ / B♭**

YOUR TURN 5. **D → C♯ / D♭** 6. **F → E** 7. **A♯ / B♭ → A** 8. **G → F♯ / G♭**

PLAY 9. **C to E: 4** 10. **E to G: 3** 11. **F to A: 4** 12. **D to F: 3**

Watch for

Counting the key they stand on as the first step ("C, C♯, D -- three!"). Skipping the black key and landing on the next white key. From E and B a half step up is a white key: there is no black key on their right.

If stuck, try saying

"Count the steps, not the keys: the first step lands on the very next key."

p. 3 A whole step: a tone

TRY IT 1. **C → D** 2. **F → G** 3. **E → F♯ / G♭** 4. **G♯ / A♭ → A♯ / B♭**

YOUR TURN 5. **D down → C** 6. **G up → A** 7. **B down → A** 8. **F down → D♯ / E♭**

PLAY 9. **C D: whole** 10. **E F: half** 11. **F♯ / G♭ G♯ / A♭: whole** 12. **D♯ / E♭ E: half**

Watch for

Thinking a whole step is always from a white key to the next white key: E to F is not. From E a whole step up is the black key F♯; from F a whole step down is E♭. A whole step can be black to black (F♯ to G♯).

If stuck, try saying

"Two half steps: one key in between."

p. 4 White half steps: E F and B C

TRY IT **1-7: W W H W W W H**

YOUR TURN **8-14: W H W W W H W W**

PLAY **6 circles: E F and B C in each of the three octaves**

Watch for

Calling every pair of white neighbours a tone. Missing the B C that crosses from one octave into the next. The pattern from C -- W W H W W W H -- is the major scale's; AMEB and the scales chapter write it T T S T T T S (tone, semitone): accept either.

If stuck, try saying

"Is there a black key between them?"

p. 5 Sharp and flat: one key, two names

TRY IT 1. **C♯ = D♭** 2. **D♯ = E♭** 3. **F♯ = G♭** 4. **G♯ = A♭** 5. **A♯ = B♭**

YOUR TURN 6. **F♯: F up → F♯ / G♭** 7. **B♭: B down → A♯ / B♭** 8. **D♯: D up → D♯ / E♭** 9. **A♭: A down → G♯ / A♭**

PLAY 10. **C♯ D♭: yes** 11. **F♯ A♭: no** 12. **E♭ D♯: yes** 13. **G♯ B♭: no** 14. **G♭ F♯: yes** 15. **A♯ B♭: yes** 16. **D♯ D♭: no** 17. **A♭ G♯: yes**

Watch for
Thinking a black key has one name, or that a sharp is always the black key on the right of any key: the sharp is named from the white key on its left, the flat from the white key on its right. Writing the sign before the letter ("♯F").

If stuck, try saying
"A half step up from C is C sharp; a half step down from D is D flat -- the same key."

p. 6 Sharps and flats on the staff

TRY IT **F♯ on the top line** **B♭ on the middle line** **C♯ in the third space** **E♭ on the bottom line**

YOUR TURN 1. **D♭** 2. **F♯** 3. **E♭** 4. **A♯** 5. **F♯** 6. **D♭** 7. **A♭** 8. **G♯**

PLAY 9. **F♯: F♯ / G♭** 10. **E♭: D♯ / E♭** 11. **C♯: C♯ / D♭** 12. **D♯: D♯ / E♭**

Watch for
Writing the sign after the note, or a line or space too high or too low: the sharp's box and the flat's round belly sit on the note's own line or space. Reading the letter without the sign.

If stuck, try saying
"The letter first, then the sign: F sharp. Write the sign first, then the note."

p. 7 The check-up on paper (the Workbook's last page)

A 1. **G up → G♯ / A♭** 2. **D♯ / E♭ down → D** 3. **E up → F** 4. **F down → E**

B 5. **D up → E** 6. **A down → G** 7. **C♯ / D♭ up → D♯ / E♭** 8. **E down → D**

C **9-15: H W W W H W W**

D 16. **D♯ = E♭** 17. **G♯ = A♭** 18. **F♯ = G♭**

E 19. **D♯** 20. **G♭** 21. **D♯** 22. **G♭**

If a concept is not passed, go back to: **A** Lesson step 1, workbook page 2 · **B** Lesson step 2, workbook page 3 · **C** Lesson step 3, workbook page 4 · **D** Lesson step 4, workbook page 5 · **E** Lesson step 5, workbook page 6
