PART I · WHICH NOTE

Pitch

Every note is higher or lower than another. This part starts with the keyboard you can see and touch, moves to the staff where those keys are written, and ends with the families of notes, scales and keys, that whole pieces are built from.

1 **Keyboard** high and low, the patterns › 2 **Staff** lines, spaces and clefs › 3 **Note names** reading every note › 4 **Sharps and flats** the black keys › 5 **Intervals** the distance between notes › 6 **Scales and keys** notes in families

PART I · PITCH · 1

The keyboard

Keys to the **left** sound **lower**; keys to the **right** sound **higher**. The black keys come in groups of **two** and **three**, and that pattern repeats all the way along: it is how you find every note.

The white keys

Seven letters, **A B C D E F G**, then the letters start again, like the days of the week. **C D E** sit around each group of two black keys (C just left of it), **F G A B** around each group of three (F just left of it): the two tints on the picture.

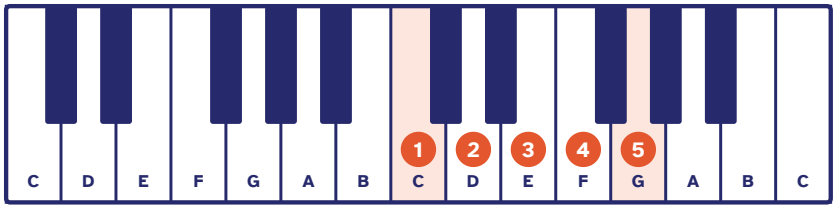

Middle C and octaves

Middle C is the C nearest the middle of the keyboard. From one C to the next is an **octave**: eight white keys, counting both. Octaves are numbered from the bottom: middle C is **C4**, the C below it C3, the C above C5; every key up to the next B shares the number (D4, E4 … B4).

TERM	MEANING	FIRST MET
pitch	how high or low a sound is	Level 0
register	a part of the keyboard: low, middle or high	Level 0
semitone	from one key to the very next key, black or white	Level 0
tone	two semitones	Level 0
octave	from one note to the next with the same name (8 white keys, 12 semitones)	Level 0

IN ACTION

Find G4 on the keyboard

1. **Find middle C (C4):** the C just left of the two black keys nearest the middle.
2. **Count up the letters**, one white key each: C D E F G is five keys.
3. **Same octave**, so the number stays 4.

The key: **G4**. One octave higher, the next G, is G5.

PART I · PITCH · 2

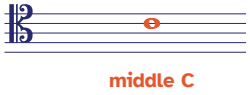

The staff and the clefs

Music is written on a **staff** (or stave) of five lines and four spaces. Lines and spaces are counted from the **bottom**. Higher notes sit higher on the staff. A **clef** at the start tells you which notes the lines and spaces stand for.

CLEF	NAME	HOW IT SHOWS ITS NOTE	FIRST MET
𝄞	**treble clef** (G clef)	curls round the line for G (line 2)	Level 0
𝄢	**bass clef** (F clef)	its two dots sit either side of the line for F (line 4)	Level 0

Alto clef: middle C on line 3. Used by the viola.

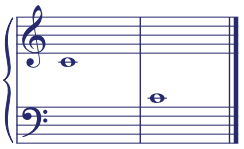

Tenor clef: middle C on line 4. Cello, bassoon and trombone, up high.

Other clefs. C clefs: the line through the centre of the clef is middle C. Piano music never uses them, but pianists meet them in theory exams and when reading the viola or cello part in chamber music or a score (Level 2).

The grand staff

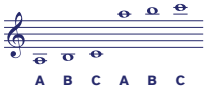

Piano music uses two staves joined by a brace: the treble staff, usually for the right hand, above the bass staff, usually for the left. **Middle C** sits between them on a short line of its own, and can be written in either staff.

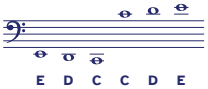

Middle C in the treble staff (left) and in the bass staff (right): the same key.

Ledger lines

Notes above or below the staff sit on short extra lines called **ledger lines**, spaced like the staff lines.

Treble: A, B, C below; A, B, C above.

Bass: E, D, C below; C, D, E above.

Octave signs

SIGN	MEANING
8va	an octave higher, as far as the dotted line
8vb	an octave lower
15ma	two octaves higher (Level 4)
loco	back where it is written

Level ½. Octave signs save writing many ledger lines.

PART I · PITCH · 3

Reading the notes

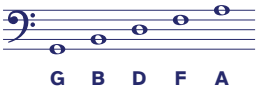

Each line and space has one letter name. Learn them in two ways: by the patterns below, and by a few **landmark notes** you can find instantly and count from.

Treble clef: the lines

Treble clef: the spaces

Bass clef: the lines

Bass clef: the spaces

STAFF	NOTES, BOTTOM TO TOP	TO REMEMBER
Treble lines	E G B D F	*Every Good Boy Deserves Fun*
Treble spaces	F A C E	spells *FACE*
Bass lines	G B D F A	*Great Big Dragon Flies Away*
Bass spaces	A C E G	*All Cows Eat Grass*

Landmark notes

Find these first. Every other note is a **step** (line to space) or a **skip** (line to line) away.

Treble clef

Middle C on its ledger line below; the G the clef curls round (line 2); the C in the third space.

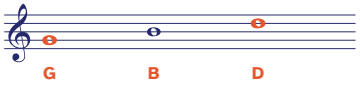

Bass clef

The C in the second space; the F between the clef's dots (line 4); middle C on its ledger line above.

IN ACTION

Read a note you are not sure of

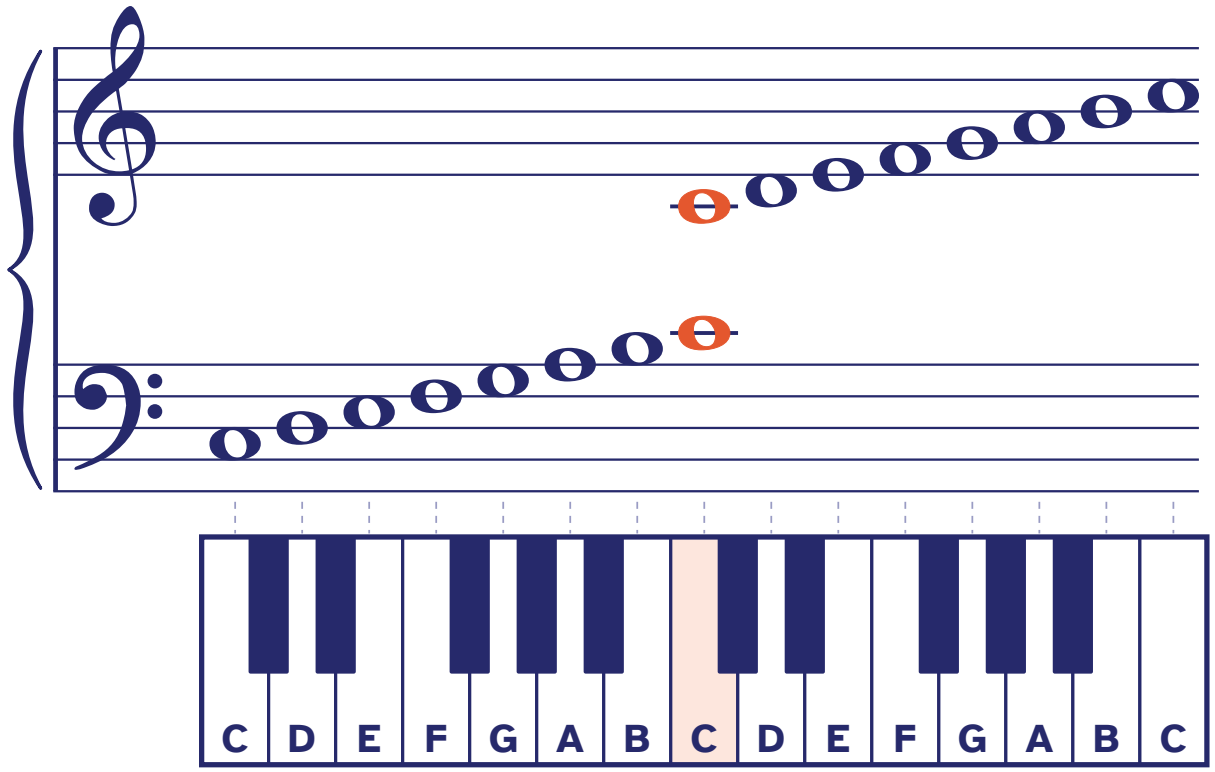

1. **The clef:** treble.
2. **A landmark:** the G the clef curls round, on line 2.
3. **Skip up** line to line, one letter jumped each time: G, B, D.

The note on line 4 is **D**.

PART I · PITCH · 4

The staff and the keyboard

Every line and space of the grand staff is one white key. Read from left to right, the notes climb the staff exactly as the keys climb the keyboard: two octaves from C3 to C5, with middle C in coral where the two staves meet.

middle C

What the map shows

Each step up the staff (line to space, space to line) is the next **white** key. The black keys have no line or space of their own: they are written with a sharp or a flat on a white key's line or space (p. 26).

Two ways to write one key

Middle C can sit on a ledger line below the treble staff or above the bass staff. Both mean the same key; the music chooses the staff of the hand that plays it.

PRACTISE IT
Workbook Pitch 1–2 · Online: Library › Staff and clefs

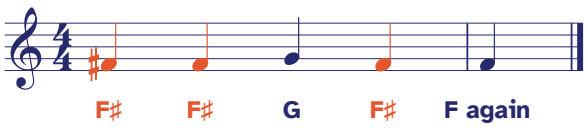

PART I · PITCH · 5

Sharps, flats and naturals

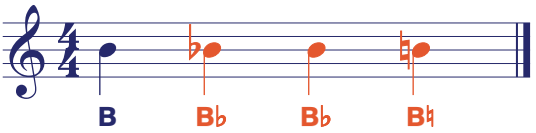

An **accidental** written before a note changes its pitch by a semitone. On the keyboard, a sharp usually means the black key to the right, a flat the black key to the left.

SIGN	NAME	WHAT IT DOES	FIRST MET
♯	sharp	raises a note by a semitone	Level 0
♭	flat	lowers a note by a semitone	Level 0
♮	natural	cancels a sharp or flat	Level ½
𝄪	double sharp	raises by two semitones	Level 4
𝄫	double flat	lowers by two semitones	Level 4

An accidental lasts for the bar

The sharp still counts later in the bar; after the bar line, F is F again.

A natural cancels the flat for the rest of the bar.

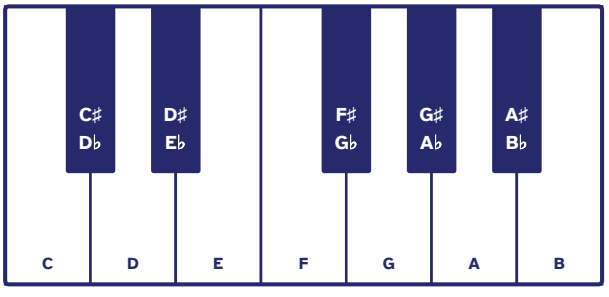

Only that line or space. A sharp on the F in the first space does not change the F an octave higher.

A tie carries it on. A note tied across the bar line keeps its accidental.

Reminders. A courtesy accidental, sometimes in brackets, just reminds you after a bar line.

One key, two names

Every black key has two names: the key between F and G is both **F♯** and **G♭**. Notes that sound the same but are written differently are **enharmonic**. White keys can have sharp or flat names too: **E♯** is F, **C♭** is B.

THINK OF IT Like a colour wheel: colours side by side blend smoothly, colours on opposite sides clash. C and G sit side by side; C and F♯ sit opposite, and sound far apart.

PART I · PITCH · 6

Counting intervals

An **interval** is the distance between two notes. A **semitone** is the very next key; a **tone** is two semitones. An interval's **number** comes from counting letter names, both ends included.

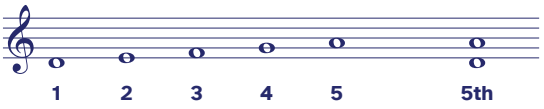

E–F and B–C are semitones; C–D and F–G are tones.

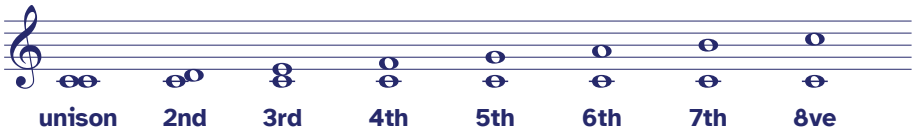

Melodic: one note after the other. Harmonic: together.

Counting the number

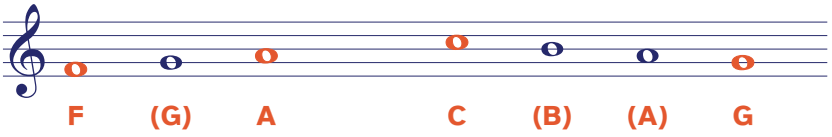

D up to A: D E F G A is five letters, so the interval is a 5th, whether the notes come one after the other or together.

Interval numbers from C

IN ACTION

How far apart are these notes?

1. **Call the first note 1:** F is 1.
2. **Count every letter to the second note:** F G A is 3 letters: a 3rd.
3. **Going down works the same:** C B A G is 4 letters: a 4th.

F up to A is a **3rd**; C down to G is a **4th**. Sharps and flats never change the number.

THINK OF IT Put your thumb on C and your little finger on G: five fingers on five white keys, a 5th. Your hand measures intervals for you.

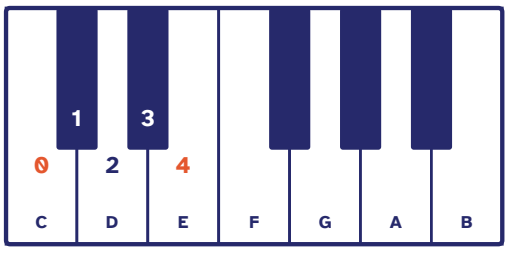

SEE ALSO
Major, minor and perfect p. 28 · Scales p. 29

PRACTISE IT
Workbook Pitch 4 · Online: Library › Intervals

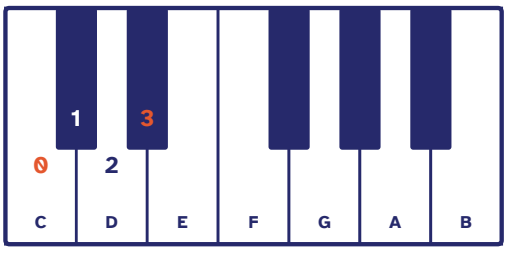

PART I · PITCH · 7

Major, minor and perfect

Two intervals with the same number can differ in size. C–E and C–E♭ are both 3rds, but one is a semitone wider. The **quality** (major, minor, perfect…) comes from counting **semitones**.

C to E: count every key, black and white. 4 semitones: a major 3rd.

C to E♭: 3 semitones: a minor 3rd.

Size in semitones

NUMBER	SMALLER	MAIN	WIDER	FIRST MET
unison	0			Level 1
2nd	1 (minor)	2 (major)		Level 1
3rd	3 (minor)	4 (major)		Level ½
4th		5 (perfect)	6 (augmented)	Level 1
5th	6 (diminished)	7 (perfect)		Level 1
6th	8 (minor)	9 (major)		Level 2
7th	10 (minor)	11 (major)		Level 2
octave		12 (perfect)		Level 1

2nds, 3rds, 6ths, 7ths
diminished ‹ **minor** ‹ **major** › augmented

unisons, 4ths, 5ths, octaves
diminished ‹ **perfect** › augmented

Each step on the ladder is one semitone. Six semitones (an augmented 4th or diminished 5th) is the tritone. Turned upside down, an interval's numbers add to 9 and major and minor swap: a major 3rd becomes a minor 6th.

SEE ALSO
Counting intervals p. 27 · Chords p. 50

PRACTISE IT
Workbook Pitch 4 · Online: Library › Intervals

PART I · PITCH · 8

Major scales

A **scale** is a ladder of notes from one key note up to the next, in a fixed pattern of tones (T) and semitones (S). The pattern, not the starting note, makes a scale major or minor.

C major: T T S T T T S. The semitones fall between 3–4 and 7–8.

SCALE	STEPS	FIRST MET
major	T T S T T T S	Level ½
natural minor	T S T T S T T	Level ½
harmonic minor	T S T T S T+S S	Level ½
melodic minor (up)	T S T T T T S; down as the natural minor	Level 2
chromatic	every semitone	Level 2
pentatonic (black keys)	T T T+S T T+S	Level 0

Degree names

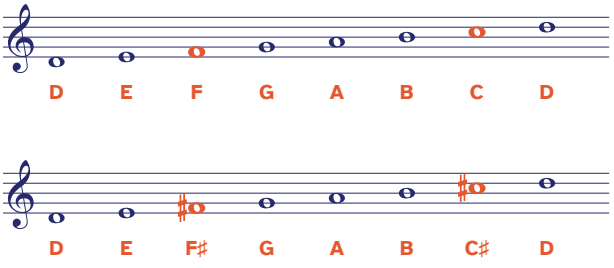

1 tonic · **2** supertonic · **3** mediant · **4** subdominant · **5** dominant · **6** submediant · **7** leading note

Major or minor?

The same key note can start a major or a minor scale: C major and C minor. The pattern decides. Major sounds bright and settled; minor, darker.

IN ACTION

Build D major

1. **Write the eight letters** from D to D, every letter once.
2. **Check the steps** against T T S T T T S: E–F is too small, B–C is too small.
3. **Raise F and C** a semitone to fix them.

D major: **D E F♯ G A B C♯ D**, two sharps.

PART I · PITCH · 9

Minor scales

Every minor scale starts from the natural minor, the notes of its relative major from the 6th degree up. Two small changes give the harmonic and melodic forms, which sound stronger at the top.

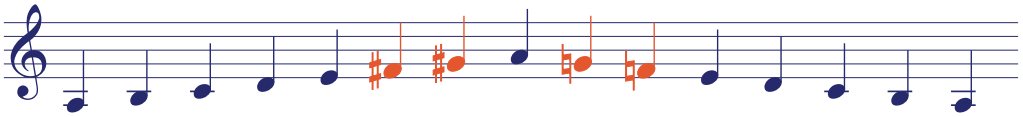

A minor in three forms

Natural: the notes of C major, from A to A. T S T T S T T.

Harmonic: the 7th raised a semitone (**G♯**). The gap F–G♯ is a tone and a half.

Melodic: the 6th and 7th raised going up (**F♯ G♯**), lowered coming down (**G♮ F♮**).

Relative minor

Same key signature, three semitones below the major: C major and A minor share every note.

Parallel minor

Same key note, different signature: C major (no sharps or flats) and C minor (three flats).

THINK OF IT The relative minor lives in the same house as its major, with the same furniture (notes); the parallel minor lives at the same address (key note) but furnishes it differently.

Hear it everywhere: the raised 7th of the harmonic minor gives Bach's minor fugues, Middle Eastern melodies and film villains their tense pull; the melodic minor runs smoothly up through jazz lines and Baroque solos; the natural minor is the sound of many folk songs and pop ballads.

SEE ALSO
Scales p. 29 · Keys and key signatures p. 31

PRACTISE IT
Workbook Pitch 5 · Online: Scale finder, Library › Scales

PART I · PITCH · 10

Keys and key signatures

A **key signature** at the start of each line lists the sharps or flats the piece uses throughout, so they do not have to be written before every note. They always appear in the same order.

Sharps: F C G D A E B. The key note is a semitone above the last sharp.

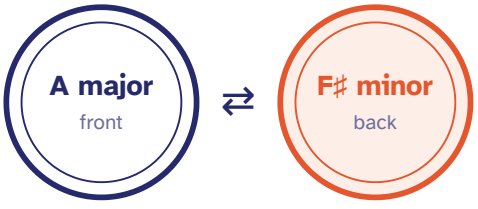

Flats: B E A D G C F. From two flats, the second-last flat names the key.

To remember the order: **F**ather **C**harles **G**oes **D**own **A**nd **E**nds **B**attle; backwards for the flats: **B**attle **E**nds **A**nd **D**own **G**oes **C**harles' **F**ather.

MAJOR	RELATIVE MINOR	SIGNATURE	FIRST MET
C major	A minor	—	Level ½
G major	E minor	1♯	Level ½
D major	B minor	2♯	Level 1
A major	F♯ minor	3♯	Level 3
E major	C♯ minor	4♯	Level 4
B major	G♯ minor	5♯	Level 4
F major	D minor	1♭	Level ½
B♭ major	G minor	2♭	Level 1
E♭ major	C minor	3♭	Level 3
A♭ major	F minor	4♭	Level 4
D♭ major	B♭ minor	5♭	Level 4

Six and seven sharps or flats (F♯, C♯, G♭, C♭ major and their minors) come at Levels 4–6.

One signature, two keys

Every key signature belongs to **one major key and one minor key**, like the two sides of a coin: three sharps are A major or F♯ minor. The minor is the **relative minor**, three semitones below the major.

THINK OF IT A key signature is a dress code printed on the invitation: say it once at the door, and everyone at the party follows it without being told again.

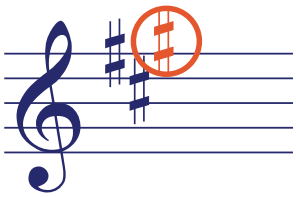

SEE ALSO
Scales p. 29 · Finding the key p. 32 · The circle of fifths p. 33

PRACTISE IT
Workbook Pitch 5 · Online: Scale finder, Library › Keys

PART I · PITCH · 11

Finding the key

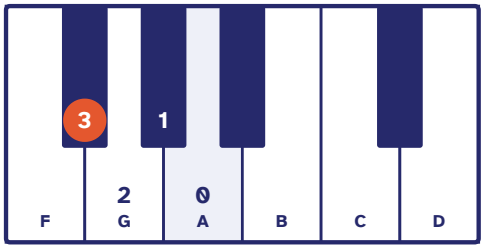

A key signature names two keys, a major and its relative minor. Three quick rules find the major; one more finds the minor; then the music itself tells you which of the two it is.

Sharps: the last sharp, then one semitone up.
Last sharp **G♯** → up a semitone → **A major**.

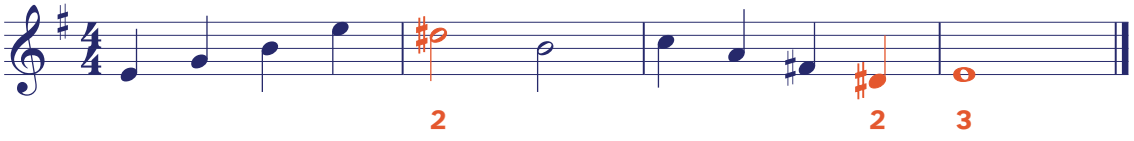

Flats: the second-last flat is the key.
B♭ **E♭** A♭ → **E♭ major**. One flat alone is F major.

Major to minor: three semitones down.
A, G♯, G, **F♯** → **F♯ minor**, the relative minor of A major (count every key, black and white).

IN ACTION

What key is this tune in?

1. **The key signature:** one sharp, so G major or its relative, E minor.
2. **The clue notes:** D♯ keeps appearing. D♯ is the raised 7th of E minor; G major has no D♯.
3. **The last note:** E, the key note of E minor.

The key: **E minor**. Check it the same way with any piece you play.

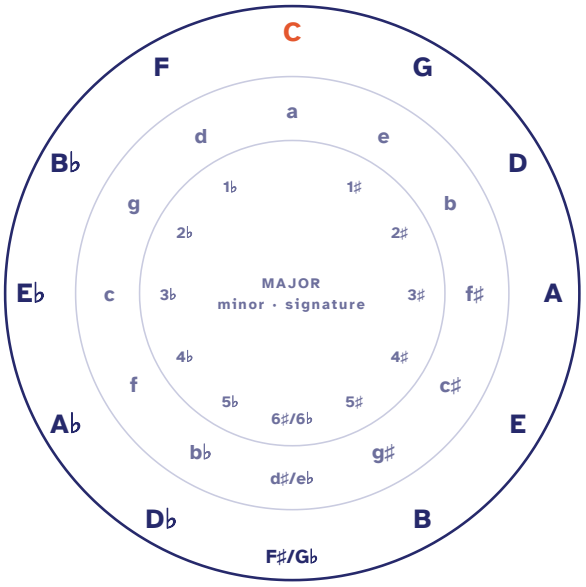

SEE ALSO
Keys and key signatures p. 31 · The circle of fifths p. 33

PRACTISE IT
Workbook Pitch 5 · Online: Scale finder, Library › Keys

PART I · PITCH · 12

The circle of fifths

All the keys on one clock face. Going round clockwise, each key is a **5th higher** than the last and has **one more sharp** (or one fewer flat). Anticlockwise, each is a 4th higher, a 5th lower, with one more flat.

Reading the circle

Outer ring: major keys. **Middle ring:** their relative minors (small letters). **Inner ring:** the key signature.

Neighbours are close

Keys next to each other share all but one note, so music moves between them easily: from C major to G major or F major, or to the relative minor. These are the **related keys**.

Six ways to use it

Key signatures

Count the steps from C: clockwise for sharps, anticlockwise for flats.

Relative minors

Look straight in from any major key.

The main chords

A key's two neighbours give its other main chords: in C, the chords of F and G.

Cadences

The strongest close, V to I, is one step anticlockwise: G to C.

Changing key

Pieces usually move one step round, or to the relative minor.

Scale practice

Go round the circle: one new sharp or flat each time.

IN ACTION

Why do G major and D major sound so close?

G major: one sharp (F♯). D major: two sharps (F♯, C♯).

1. **Find both on the circle:** D is one step clockwise from G.
2. **Compare the notes:** G A B C D E F♯ and D E F♯ G A B C♯.
3. **Only one note differs:** C becomes C♯.

Neighbours on the circle share six of their seven notes, which is why music moves between them so easily.

PART II · WHEN, AND FOR HOW LONG

Time

Music moves through time. Underneath it runs a steady **pulse**; the pulse is grouped into **bars**; and every note and rest takes a measured share of it. This part goes from that big picture down to the length of a single note.

1	›	2	›	3	›	4	›	5
Pulse the steady beat underneath		**Bar** beats in groups of 2, 3 or 4		**Time signature** how many beats, and which note is one beat		**Note values** how long each sound lasts		**Rhythm** the pattern of long and short

IN THIS PART

Pulse, tempo and the bar 36
Notes and rests 38
How long is a note? 40
Time signatures 42
Compound and irregular time 44
Rhythm: groups and upbeats 46
Rhythm: off the beat 48

PART II · TIME · 1

Pulse, tempo and the bar

Under almost every piece runs a **pulse**: a steady beat, like a heartbeat or a clock. Its speed is the **tempo**. Beats are grouped into **bars**, and the first beat of every bar is the strongest.

Tempo

Tempo is measured in beats per minute. A **metronome mark** at the top of the music shows it: ♩ **= 60** means 60 crotchet beats a minute, one beat a second. ♩ **= 120** is twice as fast. Tempo words such as *Andante* and *Allegro* are on page 70.

Strong and weak beats

BEATS	PATTERN	FEELS LIKE
2	**Strong** weak	a march
3	**Strong** weak weak	a waltz
4	**Strong** weak **medium** weak	most songs

Bars and bar lines

SIGN	NAME	MEANING
	bar line	divides the music into bars
	double bar line	marks the end of a section, or a change of key, time signature or tempo
	final bar line	marks the end of the piece
	repeat signs	play the passage between them again; if there is no start sign, go back to the beginning

Counting

Three bars of 3/4. Every beat is counted, even inside a long note: the coral number is where you play, the grey numbers are the beats you hold.

Count aloud at one speed, a little louder on beat 1. With a metronome, start slower than you think and speed up only when the passage is steady.

WATCH OUT

- × Speeding up in the easy bars and slowing down in the hard ones: choose a tempo you can keep in the hardest bar.
- × Counting the notes instead of the beats.

PART II · TIME · 1 · CONTINUED

IN ACTION

Is this a march or a waltz?

1. **Tap a steady beat** as you clap or listen.
2. **Find the strong one:** the coral beats feel heavier.
3. **Count the gap** between strong beats: 1 2 3, 1 2 3.

Groups of three: a **waltz**, in 3/4. Groups of two would be a march.

THINK OF IT The pulse is a heartbeat or a ticking clock: it keeps going even when nothing is played.

IN REAL MUSIC

One pulse, every style

WALTZ · 3 BEATS
The Blue Danube (Johann Strauss II), Chopin's waltzes: strong, weak, weak.

MARCH · 2 BEATS
Sousa's marches: left, right, left, right.

POP AND ROCK · 4 BEATS
Almost every song on the radio: the drummer's kick drum marks beats 1 and 3.

FILM MUSIC · TEMPO AS MOOD
A slow pulse for sadness or awe, a fast one for a chase: the tempo tells the story before the tune does.

Try it. Put on any song and tap your foot. Then find beat 1: it is where the music feels heaviest and the chords usually change.

IN ACTION

Set the tempo before you play

1. **Read the mark:** ♩ =96 means 96 crotchet beats a minute.
2. **Set the metronome** and listen to one full bar first.
3. **Count one bar aloud** (1 2 3), then start on the next beat 1.

The first note is already **in time**, not a guess.

TWO-MINUTE DRILL Walk round the room to a metronome at 60, 90 and 120: a step on every beat, a clap on every beat 1.

LISTEN FOR IT

Strauss, The Blue Danube
Orchestral waltz
Feel ONE big beat per bar: the "oom" of oom-pah-pah.

Sousa, The Stars and Stripes Forever
Brass march
Left-right steps: two strong beats a bar.

Any pop chorus
Drum kit
The snare lands on beats 2 and 4: the backbeat.

SEE ALSO
Time signatures p. 42 · Tempo words p. 70

PRACTISE IT
Workbook Level 0 · Pulse · Online: Metronome

PART II · TIME · 2

Notes and rests

A note's shape shows how long it lasts: each plain note lasts **half as long** as the one above it. Every note has a **rest** of the same length, a silence counted just as carefully as a sound.

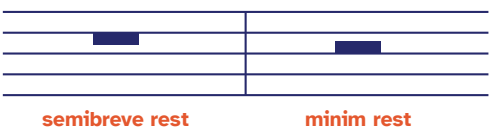

NOTE	REST	NAME	ALSO CALLED	BEATS*	FIRST MET
		breve	double whole note	**8**	Level 4
		**dotted semibreve**	dotted whole note	**6**	*Extra*
		**semibreve**	whole note	**4**	Level 0
		**dotted minim**	dotted half note	**3**	Level 0
		**minim**	half note	**2**	Level 0
		**dotted crotchet**	dotted quarter note	**1½**	Level ½
		**crotchet**	quarter note	**1**	Level 0
		**dotted quaver**	dotted eighth note	**¾**	Level 3
		**quaver**	eighth note	**½**	Level 0
		**semiquaver**	sixteenth note	**¼**	Level 2
		**demisemiquaver**	32nd note	**⅛**	*Extra*
		**hemidemisemiquaver**	64th note	**1/16**	*Extra*

* With the crotchet as one beat, as in 2/4, 3/4 and 4/4. *Extra*: beyond Level 8.

Parts of a note

The **head** sits on a line or in a space. A **stem** goes up on the right of the head or down on the left. **Flags** on the stem halve the value each time; groups of quavers are joined by **beams** instead of flags.

Which rest is which?

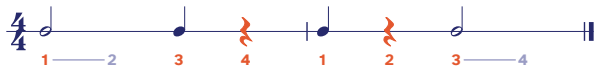

The semibreve rest **hangs** below the fourth line; the minim rest **sits** on the middle line.

PART II · TIME · 2 · CONTINUED

IN ACTION

How long is each sound, and each silence?

1. **Name each shape:** minim, crotchet, crotchet rest.
2. **Count its beats:** 2, 1 and 1.
3. **Count the rests too:** the coral rests last as long as their notes.

Every bar adds up to **4 beats**, silences included.

IN REAL MUSIC

Silence is part of the music

CLASSICAL
Beethoven's Fifth Symphony opens with a rest: the famous four notes start just after the beat.

JAZZ
Players say the notes you leave out matter as much as the ones you play.

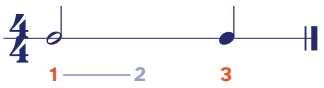

POP AND FILM
The sudden stop before the last chorus or the big hit: a full bar's rest makes the next sound louder.

DRUMS
Drum notation uses exactly the same notes and rests, on one line.

Try it. In the next piece you play, count every rest aloud and lift your hands off the keys during it.

IN ACTION

What completes the bar?

1. **The time signature:** 4/4, so the bar needs four beats.
2. **Add what is there:** minim 2 + crotchet 1 = 3.
3. **One beat is missing:** a crotchet, or a crotchet rest.

Add **one beat**: a crotchet or a crotchet rest.

TWO-MINUTE DRILL In your next piece, say each bar's values aloud in rhythm ("long, short, short") before you play it.

LISTEN FOR IT

Haydn, "Surprise" Symphony
Classical
The quiet bars set you up; the silence before the bang matters.

Beethoven, Symphony No. 5
Opening
The rest comes first: da-da-da-DUM begins on silence.

Funk and hip-hop grooves
Bass and drums
The gaps between notes make the groove.

THINK OF IT A rest is a breath in a sentence: the words stop, but the meaning carries on. Keep counting through it.

SEE ALSO
Pulse and the bar p. 36 · How long is a note? p. 40

PRACTISE IT
Workbook Level 0 · Note values · Online: Library › Notes and rests

PART II · TIME · 3

How long is a note?

Each row lasts exactly as long as the row above it: the same stretch of time, cut in half again and again.

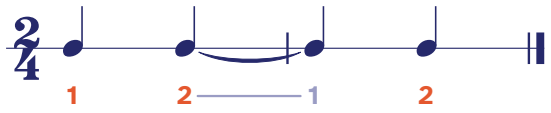

The dot

A dot adds **half the note's value**: a dotted minim lasts 2 + 1 = 3 beats; a dotted crotchet 1 + ½ = 1½. A **double dot** adds half, then a quarter: a double-dotted minim lasts 2 + 1 + ½ = 3½.

The tie

A curve joining two notes **of the same pitch** makes one longer sound: play the first, hold through the second. Ties can cross a bar line, where a dot cannot.

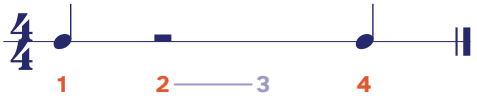

TIE OR SLUR?

The same curve over notes of **different** pitches is a **slur**: play them smoothly joined (legato). Same pitch: a tie. Different pitches: a slur.

Rests in a bar

✓ The silence on beats 3–4 is one minim rest; a whole silent bar takes a semibreve rest, in any time signature.

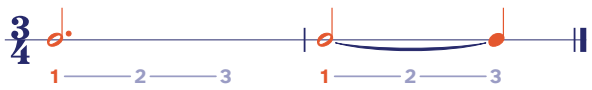

× In 4/4, a minim rest on beats 2–3 hides the middle of the bar: write two crotchet rests.

PART II · TIME · 3 · CONTINUED

IN ACTION

Dot or tie: which is longer?

1. **The dotted minim:** 2 + half of 2 = 3 beats.
2. **The tied notes:** a minim tied to a crotchet, 2 + 1 = 3 beats.
3. **Play both:** one sound, held for three beats.

They are **the same length**. A tie can also cross a bar line, which a dot cannot.

THINK OF IT A tie is a bridge between two notes: you cross it without stopping.

IN REAL MUSIC

Long and short, dotted and tied

MARCHES AND ANTHEMS
Dotted rhythms (long–short) give a proud, marching step.

BAROQUE OVERTURES
Grand openings in French style are full of sharp dotted notes.

POP AND JAZZ MELODIES
Ties across the bar line let a sung word arrive early, just before the beat.

LULLABIES
Long tied notes at phrase ends let the music breathe out.

IN ACTION

Count a double dot

1. **The minim:** 2 beats.
2. **First dot:** half of 2 = 1. **Second dot:** half of that = ½.
3. **Add:** 2 + 1 + ½ = 3½, so the quaver after it fills the bar.

A double-dotted minim lasts **3½ beats**.

TWO-MINUTE DRILL Clap a dotted crotchet and quaver (“long–short”) ten times, then clap two even crotchets: feel the difference.

LISTEN FOR IT

Bach, French Overture style
Baroque
Sharp dotted rhythms: long–short, played crisply.

“Scotch snap” in Scottish folk
Folk
The reverse: short–long, the snap comes first.

National anthems
Ceremonial
Dotted crotchet + quaver gives the lift on key words.

PART II · TIME · 4

Time signatures

Two numbers at the start of the music. The **top number** says how many counts are in each bar; the **bottom number** says which note gets one count.

The bottom number

BOTTOM	NOTE	ONE COUNT IS A	FIRST MET
2		minim	Level 3
4		crotchet	Level 0
8		quaver	Level 1
16		semiquaver	*Extra*

SIMPLE OR COMPOUND?

In **simple time** each beat divides into **two**. In **compound time** each beat is a dotted note and divides into **three**.

Quick test: a top number of 6, 9 or 12 means compound. Divide it by 3 to find the beats: 6/8 has 2, 9/8 has 3, 12/8 has 4.

Simple time: each beat divides in two

TIME SIGNATURE	EACH BAR HOLDS	FIRST MET
2/4	2 crotchets	Level 0
3/4	3 crotchets	Level 0
4/4 C	4 crotchets (the C sign: common time)	Level 0
2/2 ¢	2 minims (the cut C: cut common time)	Level 3
3/2	3 minims	Level 3
4/2	4 minims	*Extra*
3/8	3 quavers	Level 3

Changing time signature

A new time signature can appear in the middle of a piece, right after a bar line; it holds until the next one. A time signature is written only once, not on every line.

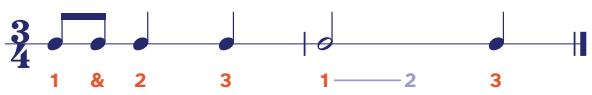

WATCH OUT

- × Reading 6/8 as six beats: at most speeds it moves in two.
- × Mixing up 3/4 and 6/8: both hold six quavers, grouped differently (page 44).

PART II · TIME · 4 · CONTINUED

IN ACTION

Read a time signature

1. **Top number 3:** three counts in each bar.
2. **Bottom number 4:** a crotchet is one count.
3. **Check a bar:** two quavers + crotchet + crotchet = 3.

3/4: **three crotchet beats** in every bar.

IN REAL MUSIC

Time signatures you already know

2/4 · POLKA
Two quick beats: hop, step.

4/4 · COMMON TIME
Most pop, rock, hymns and marches for the classroom.

6/8 · JIGS, LULLABIES
Two swaying beats, each split in three.

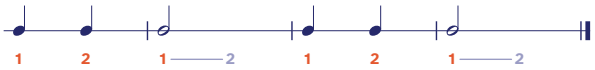

3/4 · WALTZ, MINUET
Three beats: the dance of the ballroom.

2/2 · CUT TIME
Marches and fast pieces: felt in two big beats.

5/4 AND 7/8
Take Five (Brubeck), Mars (Holst), Balkan folk dances.

IN ACTION

Which time signature fits?

1. **Find the strong beats** by clapping, accenting the first note of each bar.
2. **Count each bar:** two crotchets, or one minim: 2 beats.
3. **Each beat is a crotchet.**

It is in **2/4**: two crotchet beats a bar.

TWO-MINUTE DRILL Open three pieces you play and read only their time signatures aloud: “three crotchets a bar”, “two dotted crotchets a bar”...

LISTEN FOR IT

Tchaikovsky, Swan Lake waltzes
Ballet
Count 1-2-3, but dancers feel one lift per bar.

Brubeck, Take Five
Jazz
Five beats: count 3 + 2 and it settles.

Holst, Mars
Orchestral
5/4 that marches unevenly: 1 2 3, 1 2.

Pulse and the bar p. 36 · Compound time p. 44

PRACTISE IT
Workbook Level 0 · Time signatures · Online: Library › Time signatures

PART II · TIME · 5

Compound and irregular time

Compound time has dotted beats that divide into three; irregular time has five or seven counts, grouped unevenly. (9/4, 12/4 and the /16 signatures exist but are rare.)

Compound time

TIME SIGNATURE	EACH BAR HOLDS	FIRST MET
6/8	2 dotted crotchets	Level 1
9/8	3 dotted crotchets	Level 3
12/8	4 dotted crotchets	Level 3
6/4	2 dotted minims	Level 4

Counting 6/8

Slowly, count all six quavers. At speed, feel two beats, on 1 and 4: “1 & a, 2 & a”.

3/4 or 6/8?

3/4: six quavers in three twos

6/8: six quavers in two threes

Irregular time

TIME SIGNATURE	EACH BAR HOLDS	FIRST MET
5/4	5 crotchets: 3 + 2 or 2 + 3	Level 0
7/4	7 crotchets: 4 + 3 or 3 + 4	*Extra*
5/8	5 quavers: 3 + 2 or 2 + 3	*Extra*
7/8	7 quavers: 2 + 2 + 3 or 3 + 2 + 2	*Extra*

UNEVEN GROUPS IN 4/4

Many dances keep 4/4 but group the eight quavers 3 + 3 + 2: “1 2 3, 1 2 3, 1 2”.

PART II · TIME · 5 · CONTINUED

IN ACTION

Count 6/8 in two

1. **Slowly, count all six:** 1 2 3 4 5 6.
2. **Lean on 1 and 4**, the coral notes.
3. **Faster, count only those:** two beats, each a dotted crotchet.

6/8 has **two beats** in a bar, each split into three.

THINK OF IT Like a skipping rope: two big swings, each with three little steps inside.

IN REAL MUSIC

Uneven and compound beats in real music

6/8 · ROCKING
Row, Row, Row Your Boat; the barcarolles of Offenbach and Chopin, which imitate a gondola.

7/8 · FOLK
Dances from Bulgaria and Greece, counted 2 + 2 + 3.

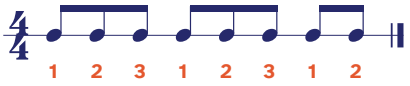

5/4 · LOPSIDED
Take Five (Dave Brubeck), Mars from The Planets (Holst), the Mission: Impossible theme.

3 + 3 + 2 · POP AND LATIN
The bass and drums of countless pop and Latin songs.

Try it. Clap 3 + 3 + 2 (accent the first of each group) along with a pop song in 4/4: it fits.

IN ACTION

Hear 3 + 3 + 2 inside 4/4

1. **Count eight quavers** in a bar of 4/4.
2. **Group them** 3 + 3 + 2, accenting 1, 4 and 7.
3. **Keep the beat** in your foot: it stays in four.

The bar is still **4/4**; only the accents are uneven.

TWO-MINUTE DRILL Tap 3 + 3 + 2 on your knees (right hand on each accent) while counting 1 to 8. Then speed up.

LISTEN FOR IT

Offenbach, Barcarolle
Opera
6/8 rocks like a boat: two beats, each split in three.

Bernstein, America
Musical
6/8 and 3/4 take turns: 1-2-3 4-5-6 then 1-2 3-4 5-6.

Latin and pop riffs
Clave, tresillo
3 + 3 + 2 hides inside so many grooves.

PART II · TIME · 6

Rhythm: groups and upbeats

Rhythm is the pattern of long and short sounds over the pulse. The pulse stays steady; the rhythm moves around it. The way notes are grouped on the page shows where the beats are.

Grouping with beams

Beams join the notes of **one beat**, so the beats stay visible. In 4/4 a beam may cover beats 1–2 or 3–4, but never cross the middle of the bar. In compound time, quavers are beamed in threes.

✓ The middle of the bar can be seen.

× A beam across beats 2–3 hides it.

The upbeat (anacrusis)

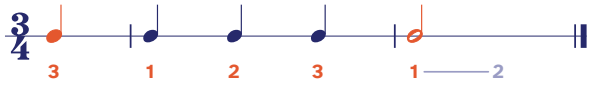

A piece can begin **before** the first full bar, with one or more notes called an upbeat or anacrusis. The last bar is then short by the same amount, so the two together make one full bar. Count the missing beats in silence before you start.

Count “1 2” silently, then play on 3.

IN ACTION

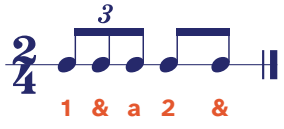

Balance the upbeat

1. **The upbeat:** one beat (count 3) before the first full bar.
2. **The last bar:** only two beats.
3. **Add them:** 1 + 2 = 3, one whole bar of 3/4.

The upbeat and the last bar **make one full bar** together.

Triplets and duplets

Triplet: three notes in the time of two.

Level 2. Three exactly equal notes.

Duplet: two notes in the time of three, in compound time.

Level 2.

PART II · TIME · 6 · CONTINUED

Counting smaller values

Crotchet, two quavers, four semiquavers and a triplet (“1 & a”): one beat each.

IN REAL MUSIC

Groups and upbeats in pieces you know

UPBEATS
Happy Birthday and Amazing Grace both start before the first strong beat.

BLUES AND ROCK
A shuffle beat is triplets with the middle one left out.

TRIPLETS
The first movement of Beethoven’s Moonlight Sonata flows in triplets from start to end.

SEMIQUAVERS
The fast running notes of Baroque keyboard music, grouped in fours.

IN ACTION

Count a triplet

1. **Find the 3:** three quavers in the time of two.
2. **Say “1 & a”** evenly across the first beat.
3. **Back to two** on beat 2: “2 &”.

Three **equal** notes in one beat: never two quick and one long.

TWO-MINUTE DRILL Say “trip-o-let, trip-o-let” to a metronome at 60, then clap it. Then play it on one note.

LISTEN FOR IT

Beethoven, “Moonlight” Sonata
Romantic
Triplets roll on under a melody in duplets.

Chopin, Fantaisie-Impromptu
Romantic
Four in one hand against three in the other.

Blues shuffle
Blues
Triplet feel: every beat swings in three.

THINK OF IT An upbeat is the breath before you speak: “and-ONE”. You lift on the upbeat so the strong beat can land.

TWO-MINUTE DRILL Sing Happy Birthday and clap only on the strong beats: “Hap-py **BIRTH**-day to **YOU**”. The first two syllables are the upbeat.

PART II · TIME · 7

Rhythm: off the beat

Once the pulse is secure, rhythm can pull against it. Every one of these effects needs a steady beat underneath.

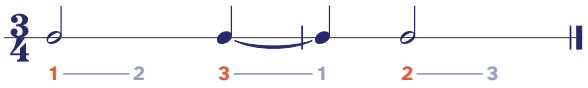

Syncopation

The crotchet starts on “&” and is held through beat 2.

Level 4. Feel beat 2 even though nothing is played on it.

Hemiola

Two bars of 3/4 felt as three minims.

Level 4. Common at cadences in Baroque dances.

Swing Level ½

Common from the first pieces: jazz, blues and many easy modern pieces are marked *swing*. Pairs of quavers are written evenly but played **long–short**, like the first and last notes of a triplet.

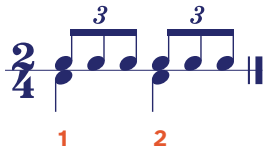

Written

Played

Polyrhythm Level 7

Three against two: a triplet above, two crotchets below, starting together.

Rubato Extra

Time is stretched and then given back, for expression: the music leans into a phrase and catches up after it. The pulse always returns. Marked *rubato*, or simply part of the style in much Romantic music.

WATCH OUT

- × Rushing the short notes after a long one: keep counting inside the long note.
- × Playing a triplet unevenly: three equal notes, not two quick and one long.
- × Letting syncopation drag the pulse: tap the beat with your foot.

PART II · TIME · 7 · CONTINUED

IN ACTION

Count a syncopation

1. **Tap the beats:** 1, 2.
2. **Find the coral crotchet:** it starts on the "&", between the beats.
3. **Hold it through beat 2**, then play bar 2 on the beats.

The accent falls **off the beat**: that is syncopation.

THINK OF IT Syncopation is a step that lands between the beats, like a skip in your walk.

IN REAL MUSIC

Off the beat, everywhere

RAGTIME
Scott Joplin's The Entertainer: syncopated right hand over a steady left hand.

JAZZ AND BLUES
Swing quavers: written even, played long–short.

MUSICALS
America from West Side Story (Bernstein) switches between two and three beats: a hemiola you can sing.

ROMANTIC PIANO
Chopin's nocturnes use rubato; his Fantaisie-Impromptu plays four notes against three.

Try it. Tap a steady beat with your foot and clap on the "&"s only. Then try the first bars of The Entertainer.

IN ACTION

Play swing quavers

1. **Read the top line:** even quavers, marked Swing.
2. **Play them as the second line:** long–short, like triplets with the middle note tied.
3. **Keep the beat even;** only the pairs lean.

Swing changes **how** quavers are played, not how they are written.

TWO-MINUTE DRILL Say "doo-ba, doo-ba" in a lazy long–short, then play a C major scale up and down in swing quavers.

TIPS · 1

Everything one note tells you

Look at the coral note. It carries six pieces of information at once, and each one can be read straight off the page. Read all six and the note is right; miss one and it is only nearly right.

1 The finger number

3: the middle finger plays it. Fingering is planned, not guessed.

PLAYING AND LISTENING (LATER)

2 The beat

Beat 1 of bar 2, and it is held for **two beats**.

PART II · TIME · P. 36

3 The note name

E: the white key just right of the two black keys.

PART I · PITCH · P. 22

4 The chord

The **C** above the staff: this E belongs to the C major chord.

HARMONY (LATER)

5 The marks

p and the slur: play it softly and smoothly.

EXPRESSION (LATER)

6 The phrase

The slur ends here, so the note lands gently, like the end of a sentence.

SHAPE AND STYLE (LATER)

THINK OF IT A note is like a word said aloud: its spelling, its timing, its tone of voice and its place in the sentence all change what it means.

THE SAME SIX, IN ANY MUSIC

A CLASSICAL SCORE

Most of it is written in: finger numbers, dynamics, slurs. Your job is to read every one.

A POP LEAD SHEET

A melody and chord names only. You choose the fingers, the marks and the shape yourself.

A JAZZ CHART

Chords and a style word such as Swing: the beat and the shape are yours to feel.

Try it on any piece: point to one note and find all six. Finger numbers count as much as the note name.

TIPS · 2

When a passage won't come right

Name the problem first, then fix that one thing. Most hard bars are hard for one reason, and the six things a note tells you point straight to it.

TIP

What you notice, what to check

WHAT YOU NOTICE	CHECK	TURN TO
You stumble in the same place every time	**the finger number**	Playing and listening
It rushes, drags or the counting slips	**the beat**	Part II · Time
A note sounds wrong	**the note name**	Part I · Pitch
A chord sounds odd or thin	**the chord**	Harmony
It is correct but flat and dull	**the marks**	Expression
It does not seem to go anywhere	**the phrase**	Shape and style

Five ways to fix a hard bar

1. **Slow it right down**
   Slow enough to be right three times in a row, then a little faster.
2. **Hands separately**
   Each hand on its own until it is easy, then together, slowly.
3. **Start from the end**
   Play the last beat, then the last two, then three: you always finish on what you know best.
4. **Practise the join**
   The last note of one bar and the first of the next: most slips live there.
5. **Climb the metronome**
   Up four clicks each time it is clean; down eight if it falls apart.
6. **Put it back**
   Play two bars before and two after, so the fixed bar lives inside the music again.

Before you play a new piece: a thirty-second look

Key signature
Which sharps or flats, all the way through?

Time signature
How many beats in a bar, and which note is one beat?

Tempo and mood
The words at the top: how fast, what character?

Patterns
Bars that repeat or nearly repeat: learn them once.

THINK OF IT Like a doctor: name the symptom first, then treat that one thing. Practising everything harder rarely fixes the one bar that is wrong.
