CHAPTER 6 · LEDGER LINES

Lesson Book draft v1 + review pack

Built on what you already decided: Clara's short line has been her **ladder rung** since chapter 4, and now it gets its real name; **Queensland** and **Kingsland** are the two staves (chapter 5); high is the **bird's sky** and low is the **turtle's sea** (chapter 2); chapter 5's three Cs grow into **five Cs**. It also follows the Book rules: one idea per page, nothing twice, set tasks, big and full pages.

AMEB (checked): Music Craft Preliminary -- one ledger line below the treble staff; Grade 1 -- one above and below both staves; Grade 2 -- up to three. Theory of Music Grade 1 -- two; Grade 2 -- three. Both spellings, "ledger" and "leger", are accepted.

The draft, 7 pages: 1 the ladders out of both lands · 2 Clara's rung is a ledger line (and how to draw one: one ✓, three ×) · 3 Up into the sky (G in the space, then A, C, E on the rungs) · 4 Down into the sea (F in the space, then E, C, A on the rungs) · 5 Between the lands (borrowed rungs: the same key, written two ways) · 6 Five Cs, from Sea C to Sky C (every ledger note in the book is a step or a skip from one of them) · 7 My five checks.

How to answer: reply with codes, e.g. "B1 yes, B3 ..., A3 ok". Yellow marks in the draft (B1, B2, B3, B4, B6) show the lines that wait for your answers.

Three questions for the public guide page

G1 When your students meet ledger lines, what goes wrong most often? (For example: counting the rungs wrong, reading a note under Queensland as a Kingsland note, drawing the lines too long or too far apart.)

G2 Counting out from the staff, or knowing a few ledger notes by heart (like the five Cs)? How do you move a student from counting to knowing?

G3 One tip for parents for this chapter: what should five minutes at home look like?

What's in this pack

A · what today's chapter 6 does (the online lesson and drill that exist now) · B · your decisions, each with my recommendation · the 7 draft pages · today's online lesson, for comparison.

A · What today's chapter 6 does

Today chapter 6 is an online lesson (4 tool steps) and a 4-level drill, plus a Workbook and Teacher copy made in Phase 298, before the Book rules. No Lesson Book and no guide page yet.

A1 The online lesson is not the Lesson Book on screen yet. After your OK it becomes the book on screen, like chapters 1-5, with a moving part for each page.

A2 Names don't match chapters 4-5: "treble staff", "bass staff", "middle C". **Draft:** Queensland, Kingsland, Clara's C, Clara's rung.

A3 Step 2 asks the child to learn **twelve notes in four lists** (A C E · C A F · C E G · E C A). It is heavy, and it is not how chapter 5 reads (from landmarks). **Draft:** count out of the land (line, space, rung) and read from the five Cs. See B5.

A4 The drill's level 1 mixes both clefs, notes above and below, and the notes just outside the staff. There is no level for the rungs between the lands and none for the Cs. See B7.

A5 On the draft pages, the moving parts on screen are today's tools for now, and some don't fit their page: "Walk off the staff" opens on Queensland on the Kingsland page; "Write them" and "Same note, other staff" ask for notes the book doesn't teach (G3, F3, F4, G4). They get rebuilt after your answers.

A6 The old Workbook and Teacher copy (Phase 298) get rebuilt by the Book rules after the Lesson Book: set, solo, big, filled; nothing twice. See B8.

A7 The chapter's picture in the app is in the old blue colours. It gets its own: the ladders out of the two lands.

A8 Small, all chapters: the heading "In this chapter" on page 1 stays in English in the Korean books (chapters 1-5 too). I'll fix it everywhere when chapter 6 is applied.

Checked by a second reviewer

A separate reviewer checked every note, ledger-line count and rung label in the pictures and the text, in English and Korean, and found them all correct. I applied its fixes:

- "Every ledger note in this book is a step or a skip from Sea C, Clara's C or Sky C". The old line, "from the nearest C", isn't true for G3 or F4.
- A ledger line is "a little wider than the note", not "as wide as" it.
- A fourth ×: "no gap below".
- The "too long" picture no longer looks like a sixth staff line.
- "Rung 2" instead of "two rungs" on page 5, to match pages 3-4.
- Page 5 now says which hand plays.
- Korean: 한 걸음 rather than 한 칸 for a step, because 칸 means a space; "발판 2개" for "2 rungs".

B · Your decisions

B1 **The name:** "ledger line" (AMEB also accepts "leger line"), in Korean 덧줄.
Rec ledger line. The Teacher copy says once that "leger" is the same thing.

B2 **The world:** ledger lines are the rungs of a ladder that lets notes climb out of the lands, up into the bird's sky and down into the turtle's sea.
Rec yes. It is chapter 4's rung growing up, and it reuses chapter 2's sky and sea instead of adding something new.

B3 **Names for the two new Cs: Sky C** (two rungs above Queensland, C6) and **Sea C** (two rungs below Kingsland, C2). Other options: "High C / Low C", or "the bird's C / the turtle's C".
Rec Sky C and Sea C. Together with chapter 5's Cs that makes Sea, Kingsland, Clara's, Queensland and Sky.

B4 **How far:** up to three rungs above and below (AMEB Grade 2). Preliminary needs only one rung below Queensland; Grade 1 needs one rung above and below both lands.
Rec three in the book. The drill levels go by rung count, so a Preliminary student can stop after level 1.

B5 **The four lists** (A C E, C A F, C E G, E C A) come out of the student's book. The student counts out of the land and reads from the five Cs instead.
Rec drop them from the book; keep one line about them in the Teacher copy.

B6 **Between the lands** (page 5): the A on rung 2 under Queensland is Kingsland's top line; the E on rung 2 over Kingsland is Queensland's bottom line; Clara's C is one rung from both. Keep it in chapter 6?
Rec keep it. It explains why Clara's rung belongs to both lands, and Grade 1 needs it.

B7 **Drill levels**, one idea each:
1 One rung, Queensland (C and B below, A and B above; Preliminary)
2 One rung, Kingsland (C and D above, E and D below)
3 Two rungs, both lands
4 Sky C and Sea C hop (a step or a skip from them)
5 Between the lands: the same key, two ways
6 Three rungs, fast (Grade 2)
7 Find it on the keys (exact octave)
Rec these seven.

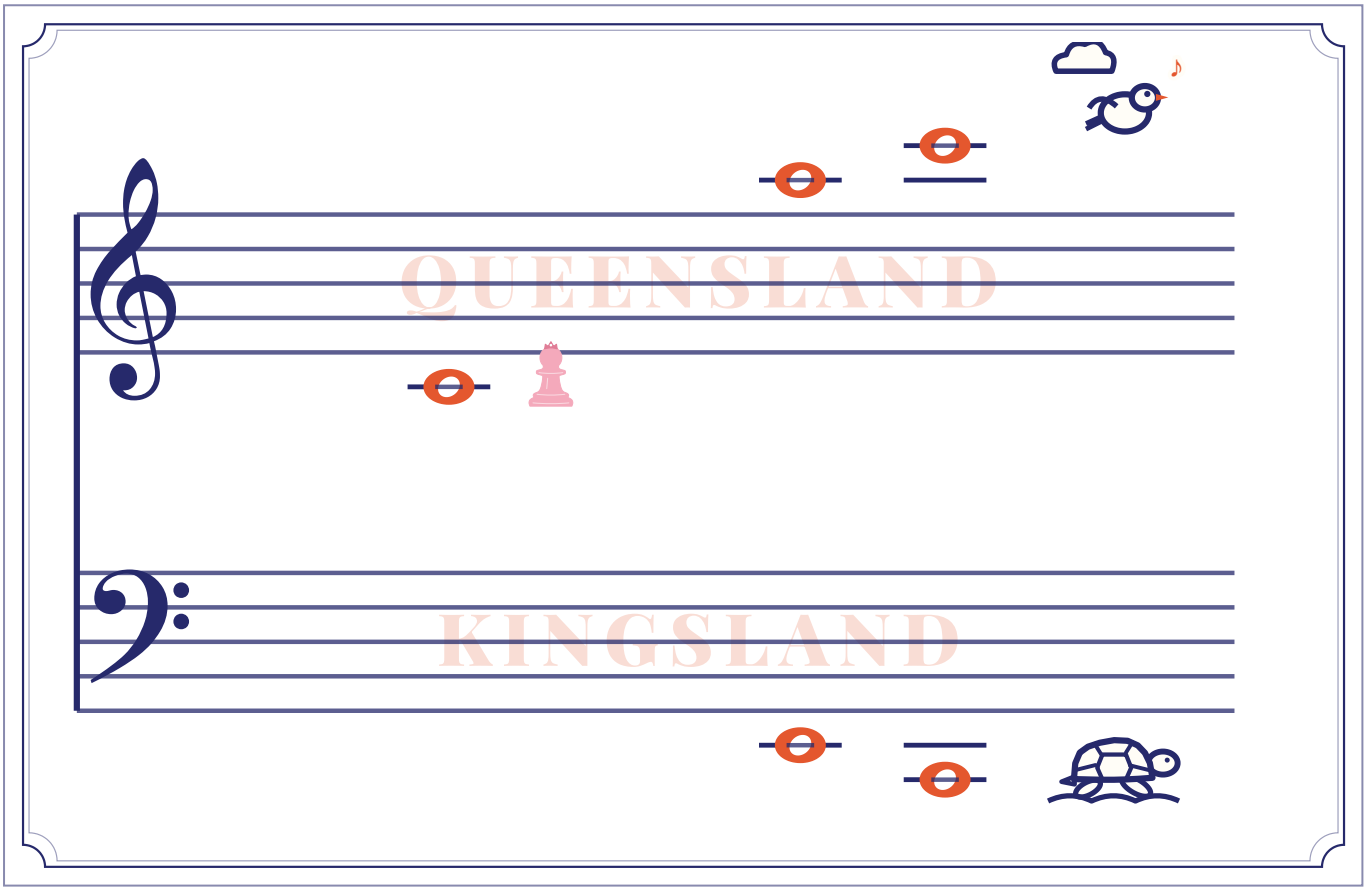

B8 **Workbook ideas** (set and solo, built after the book):
W1 draw the rungs neatly for set notes
W2 climb up out of Queensland (write the letters on the ladder)
W3 climb down out of Kingsland
W4 the same key two ways (write the twin in the other land)
W5 find the five Cs and name them
W6 a secret message in ledger notes (words like CAB, BEAD, ACE)
last page: the check-up on paper
Rec all six. Tell me any to drop.

B9 **The opener picture:** minimal, as for chapters 4 and 5. It shows the grand staff with a ladder up to the bird and a ladder down to the turtle, and Clara on her rung.
Rec keep it minimal.

CHAPTER 6

Ledger Lines

Remember Clara's short rung? It has a real name: a B1 **ledger line**. Ledger lines are the B2 rungs of a ladder that lets notes climb out of the lands -- up from Queensland into the bird's sky, down from Kingsland into the turtle's sea.

In this chapter

- [ ] Clara's rung is a ledger line 2
- [ ] Up into the sky 3
- [ ] Down into the sea 4
- [ ] Between the lands 5
- [ ] Five Cs 6
- [ ] My five checks 7

By the end, you can

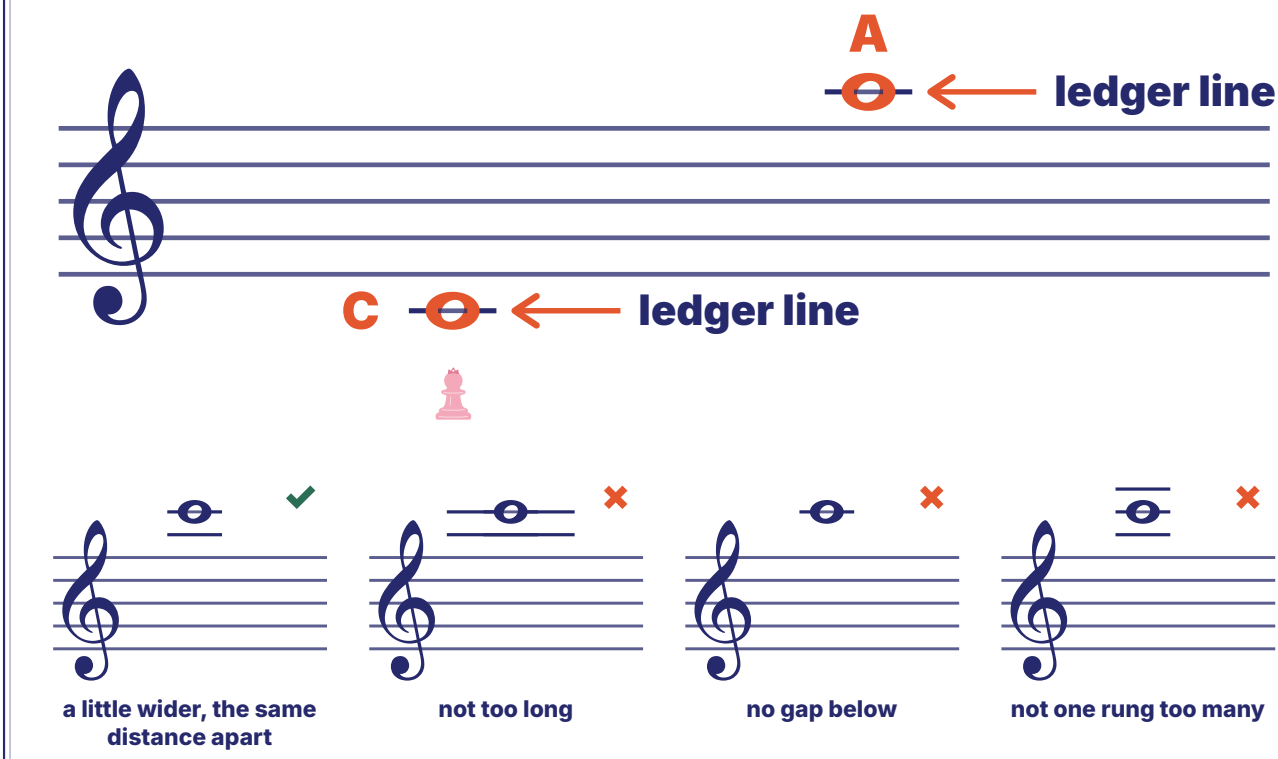

- [ ] say what a ledger line is and draw one neatly
- [ ] read up to three rungs above Queensland
- [ ] read up to three rungs below Kingsland
- [ ] read the rungs between the lands both ways
- [ ] find the five Cs from the sea to the sky

online

STEP 1

Clara's rung is a ledger line

When a note is too high or too low for the five lines, we draw a short line just for that note -- a **ledger line**. Clara's rung is one. The pattern carries on outside the staff: line, space, line, space. A ledger line is just **a little wider than the note**, the **same distance apart** as the staff lines, with **no gaps** back to the staff -- and never one more than the note needs.

At the piano

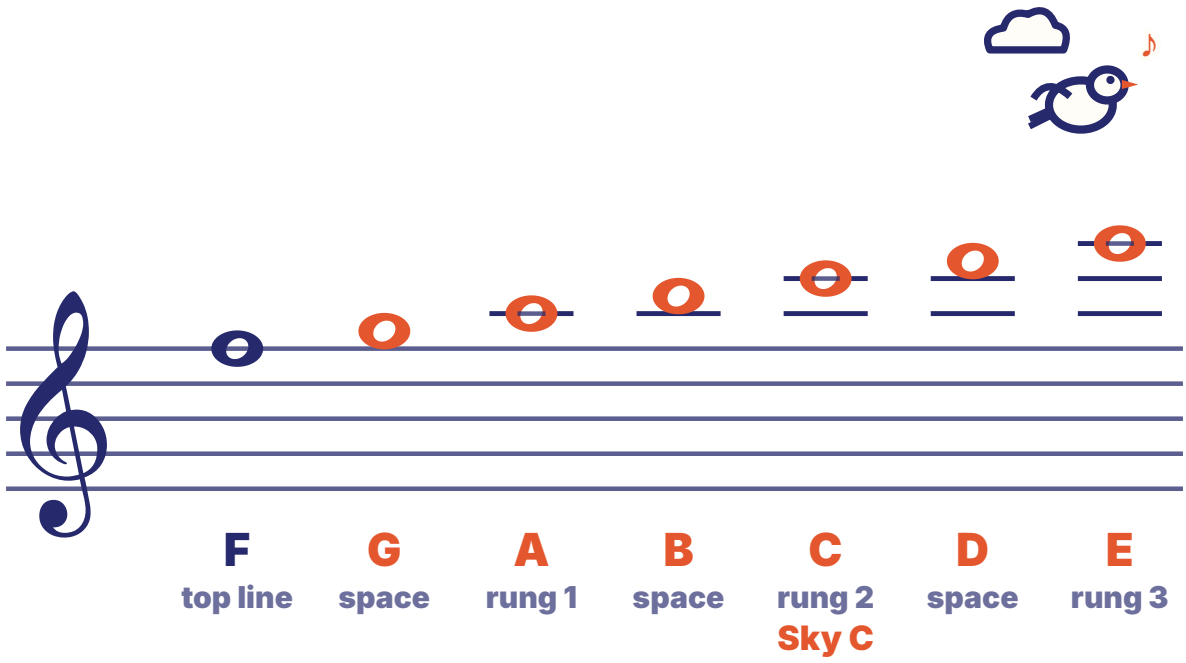

1. Play Clara's C. The short line it sits on has a real name: a **ledger line**. ☐
2. Play one more note on a ledger line: the **A** on the rung above Queensland. Clara's C and that A both sit on ledger lines. ☐

REMEMBER **A ledger line is a rung for one note: line, space, line, space -- the pattern goes on.**

STEP 2

Up into the sky

Start on Queensland's top line, **F**. Just above it, in the space, is Chapter 5's **G**. Then rung 1 carries **A**, the next space **B**, and rung 2 carries **C** -- B3 **Sky C**. Line, space, line, space: one letter a step, just like inside the staff. B4 We go as high as **three rungs**: rung 3 is **E**.

At the piano

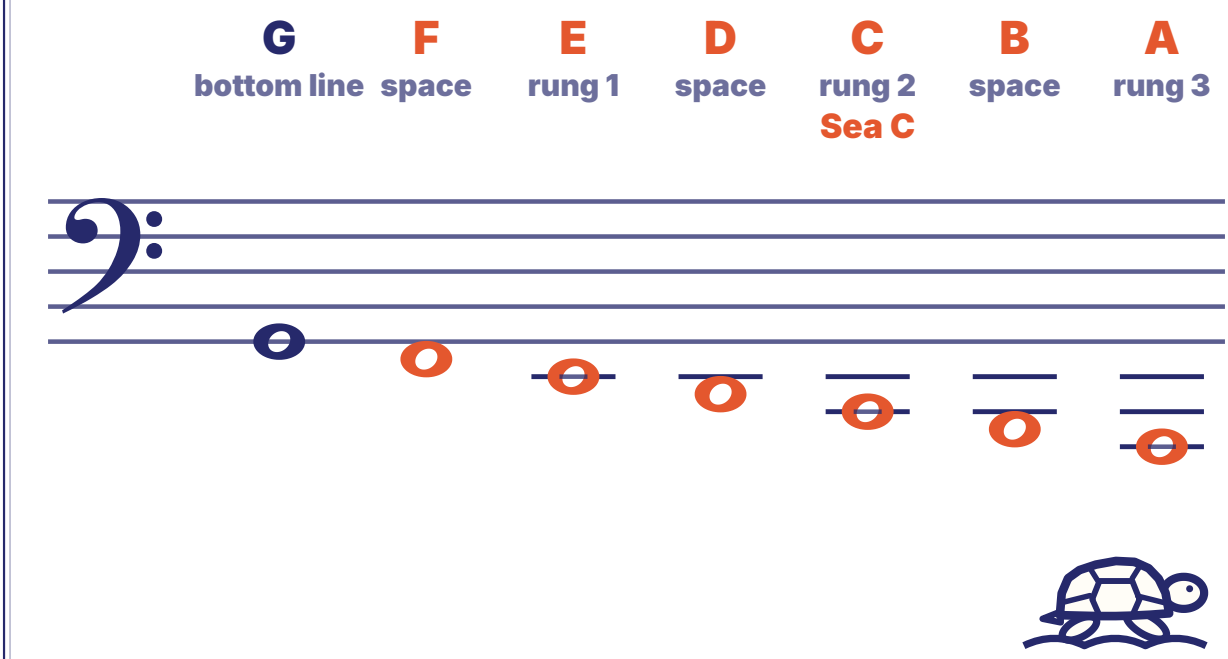

1. With your right hand, climb from F: **F G A B C** -- "line, space, rung 1, space, rung 2". ☐
2. Find **Sky C**: from Clara's C, up to the next C, and the next. ☐

REMEMBER **Out of Queensland: G in the space, then A, C, E on the rungs.**

STEP 3

Down into the sea

Now climb down from Kingsland's bottom line, **G**. Just under it, in the space, is Chapter 5's **F**. Rung 1 carries **E**, the next space **D**, and rung 2 carries **C** -- [B3] **Sea C**, down in the turtle's sea. One letter a step, backwards: G F E D C. [B4] Rung 3 is **A**.

At the piano

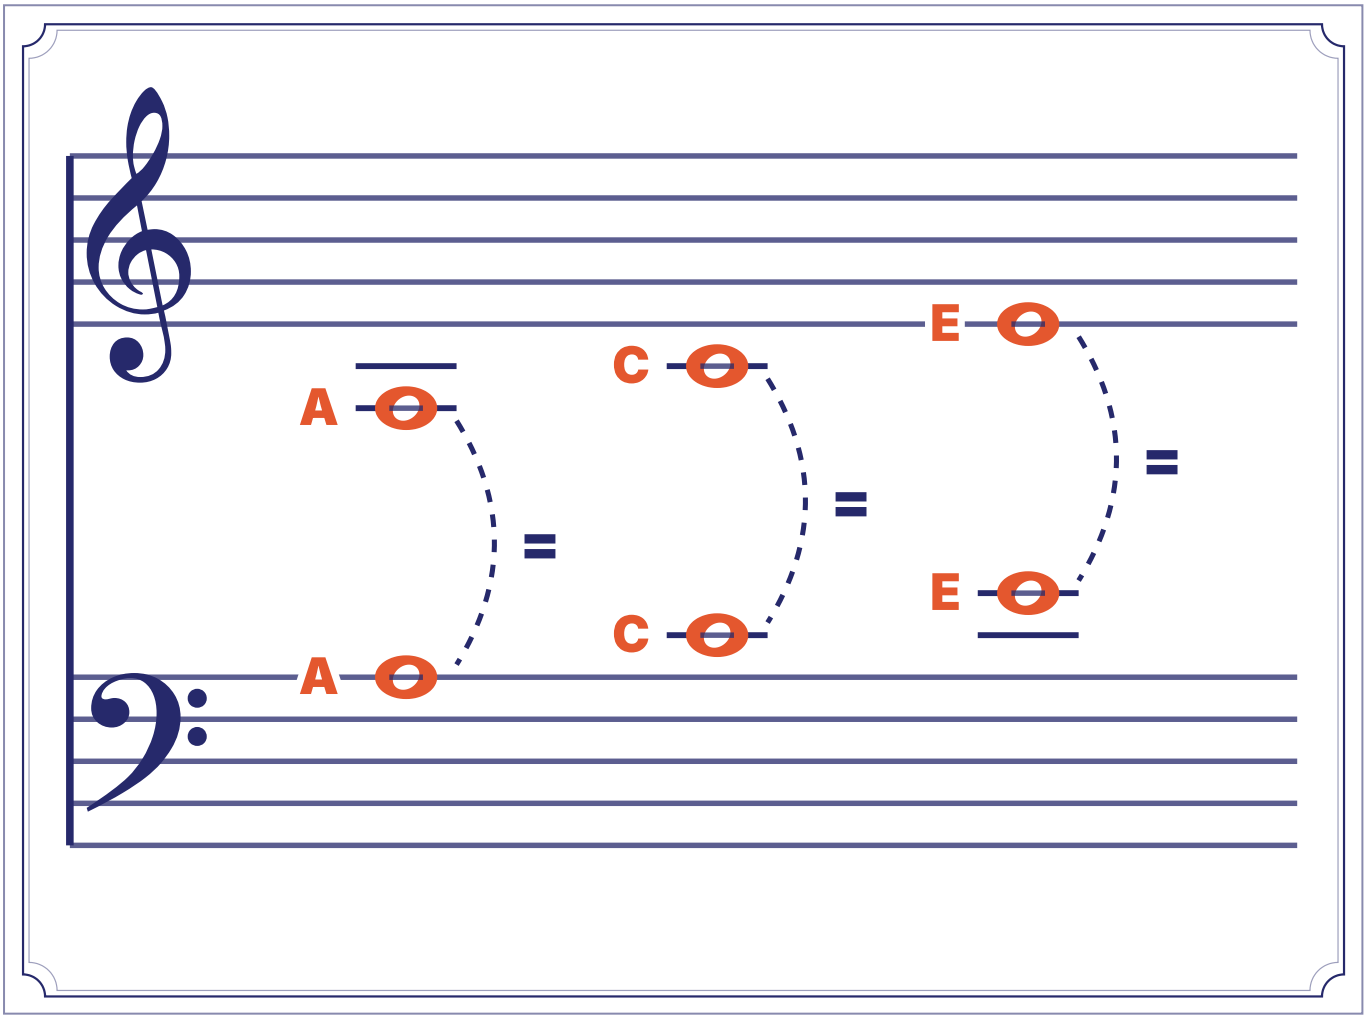

1. With your left hand, climb down from G: **G F E D C** -- "line, space, rung 1, space, rung 2". ☐
2. Find **Sea C**: from Clara's C, down to the next C, and the next. ☐

REMEMBER **Out of Kingsland: F in the space, then E, C, A on the rungs.**

STEP 4

Between the lands

B6 The rungs between the lands are **borrowed**. The A on **rung 2 under Queensland** is the same key as Kingsland's **top line, A**; the E on **rung 2 over Kingsland** is the same key as Queensland's **bottom line, E**. Clara's C is one rung from both lands. The same key can be written two ways -- so each hand can stay in its own land.

At the piano

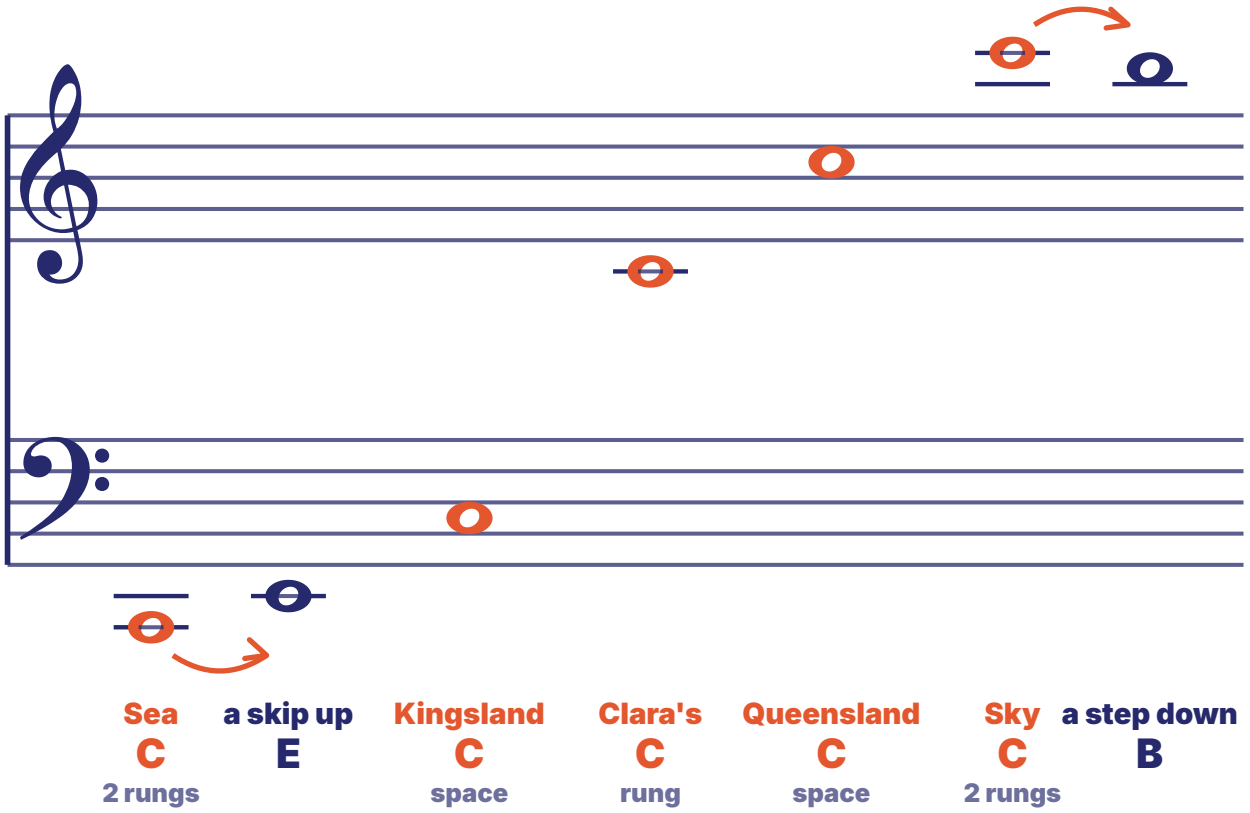

1. Play the three pairs above: A, C and E -- each once with the right hand, once with the left. The same sound! ☐
2. With your right hand, climb down out of Queensland: **E D C B A** -- "line, space, rung 1, space, rung 2" -- then point to Kingsland's top line, A. ☐

REMEMBER **Between the lands, the rungs are borrowed: the same key, two ways.**

STEP 5

Five Cs

From the sea to the sky there are five Cs, an octave apart: B3 **Sea C**, **Kingsland C**, **Clara's C**, **Queensland C** and B3 **Sky C**. They take turns: rungs, space, rung, space, rungs. Every ledger note in this book is a step or a skip from Sea C, Clara's C or Sky C.

At the piano

1. Play the five Cs from low to high, naming each one -- Sea C and Kingsland C with the left hand, the others with the right. ☐
2. **C hop:** your teacher points to a ledger note: nearest C → a step or a skip → name it → play it. ☐

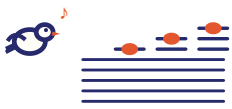

REMEMBER **Five Cs from the sea to the sky: find the nearest, then step or skip.**

CHECK-UP

My five checks

Show each one at the piano, then tick how it is going -- not yet, nearly, or got it! The check-up on paper is in the Workbook.

At the piano

		NOT YET	NEARLY	GOT IT!
	**I can point to a ledger line and say what it is**	○	◑	☆
	**I can climb out of Queensland: G, A, B, C, D, E**	○	◑	☆
	**I can climb out of Kingsland: F, E, D, C, B, A**	○	◑	☆
A = A	**I can read the rungs between the lands, both ways**	○	◑	☆
C C C C C	**I can find all five Cs fast, from the sea to the sky**	○	◑	☆

Colour a circle each time it gets better: not yet, then nearly, then got it!

Today's online lesson, for comparison

The lesson's four steps today: walk off the staff; the notes ON ledger lines (twelve notes in four lists); borrowed from the other staff; write them.

Ledger lines

Short lines that carry the staff on above and below. They follow exactly the same line-space pattern -- once you can count from the staff, they stop being scary.

1 What a ledger line is | 2 Ledger lines skip a letter | 3 Borrowed from the other staff | 4 Write them

0 of 4 steps done

STEP 1 OF 4

1 What a ledger line is

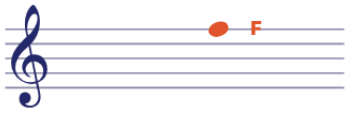

The staff keeps going
When a note is too high or too low for the five lines, we draw a short line just for it. Above and below each ledger line is a space, just like on the staff.

Count out from the staff
Start on the top (or bottom) line you know, and step out one line or space at a time: line, space, line, space.

TRY IT

Walk off the staff treble | bass

Keep stepping up (or down) past the edge of the staff. The line-space pattern carries on -- each new line is a short **ledger line** drawn just for that note.

F -- on the staff

↓ Step down | Step up ↑

Got it ✓

STEP 2 OF 4

2 Ledger lines skip a letter

Learn the notes ON the lines
Above the treble staff: A, C, E. Below it: C, A, F. Above the bass staff: C, E, G. Below it: E, C, A. Every other ledger note sits in between.

TRY IT

The notes ON ledger lines
Ledger lines skip a letter each time, exactly like the lines of the staff. Learn these twelve and you can read any ledger note from them.

Above the treble staff **A · C · E**	Below the treble staff **C · A · F**
Above the bass staff **C · E · G**	Below the bass staff **E · C · A**

Above the treble staff: 1st, 2nd and 3rd ledger lines = **A · C · E**. The notes between them are the letters in between.

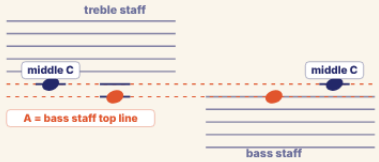

Got it ✓

STEP 3 OF 4

3 Borrowed from the other staff

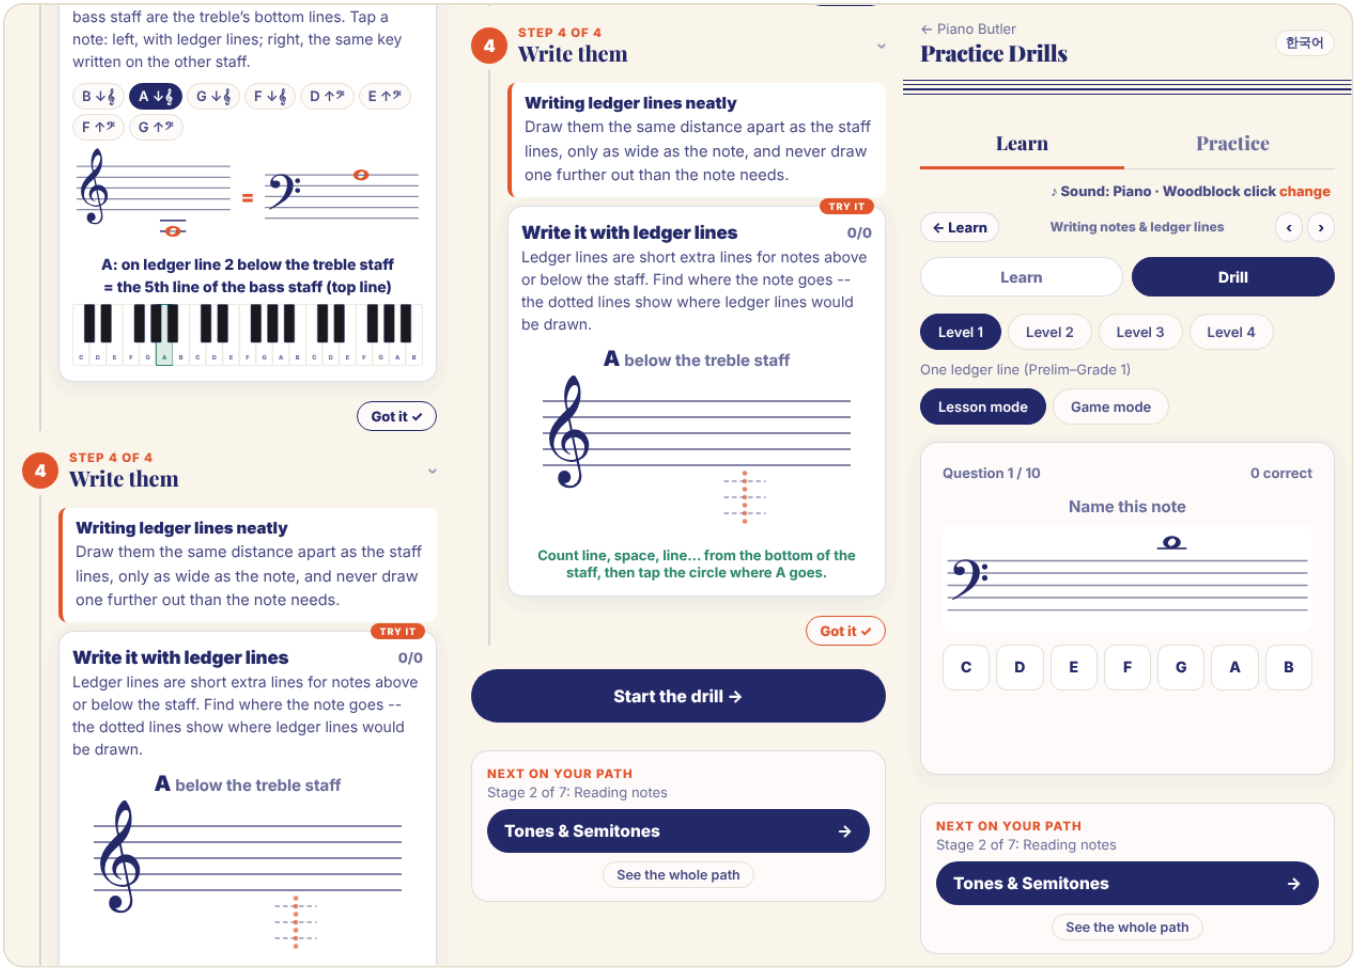

The two staves overlap
Middle C is one ledger line from both staves. Keep going: the A two ledger lines below the treble staff is the bass staff's top line; the E two ledger lines above the bass staff is the treble staff's bottom line.

The gap is really one missing line
Put the two staves together and there's room for exactly one line between them -- middle C's ledger line. Middle C written under the treble staff and middle C written above the bass staff are the same key. So ledger lines below the treble staff land on the bass staff: an A with two ledger lines under the treble staff is the **same note** as the A on the bass staff's top line.

TRY IT

Same note, other staff
The ledger lines under the treble staff are really the bass staff's top lines -- and the ones over the

Right: the drill today. Level 1, "One ledger line", mixes both clefs from the first question; levels 2-4 are two lines, three lines, and keys.
