PART V · CHORDS · 1

# Chords and triads

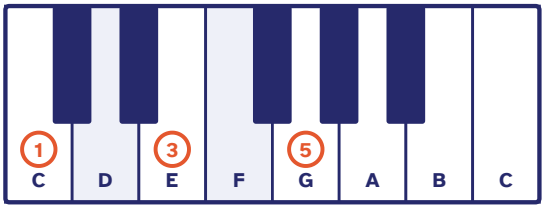

Press three or more notes at once and you have a **chord**. The favourite of all is the **triad**: three notes stacked like a layer cake.

THE SECRET

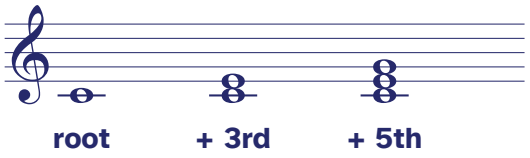

**Play one, skip one, play one: the cake rule.**

1. Pick a note: the **root**, the big layer at the bottom. It holds the chord up and gives it its name.
2. Skip one letter, take the next: **E**, the **3rd**.
3. Skip again: **G**, the **5th**. C E G is the triad of C.

On the keys: play one, skip one (shaded), play one, skip one, play one.

The cake on the staff: three lines in a row (or three spaces).

On the staff, each layer sits on the **next line up** (or the next space up): the root, a **3rd** above it, a **5th** above the root.

First met: Level ½ (the tonic triad of C, G and F major).

## All lines or all spaces

A stacked triad sits on **three lines in a row** or in **three spaces in a row**, in a neat stack. If one note breaks the pattern, it is not a stacked triad.

Lines, spaces, lines, spaces: every one a triad.

PART V · CHORDS · 1 · CONTINUED

## Solid and broken

Played together, a chord is **solid** (or blocked). Played one note at a time, it is **broken**. Spread up and down the keyboard, a broken chord becomes an **arpeggio**. Left-hand accompaniments, the arpeggios in technical work and the chord names over a song are all triads.

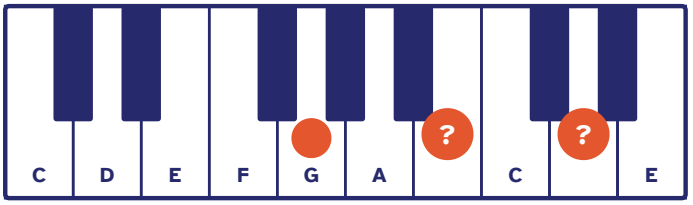

First met: Level 0; arpeggios from Level 1.

The same three notes, solid then broken.

EXAMPLE 1

### Build a triad on G

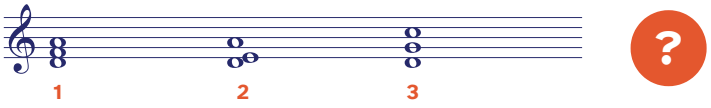

1. **Start on G** (the red dot): the root, the bottom layer.
2. **Skip one white key,** take the next: the first ?.
3. **Skip again,** take the next: the second ?.

G **B D**: the triad of **G**. Same shape as C E G, just moved up.

EXAMPLE 2

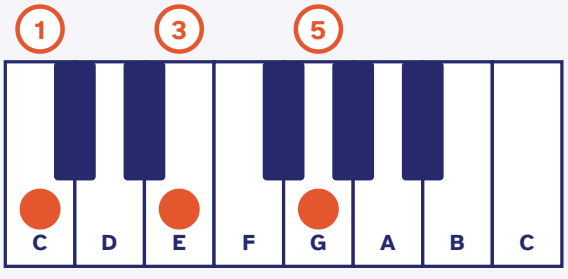

### Which one is a triad?

1. **Look at each chord:** are the three notes all on lines, or all in spaces?
2. **Count the notes** from each note to the next one up: is every gap a 3rd?
3. **Only one chord** passes both tests. Which?

**Chord 1** (D F A, three spaces in a row). Chord 2 has a 2nd (D–E); chord 3 is stacked in 4ths.

TRY IT · 10 SECONDS

**Thumb on C. Fingers 1, 3, 5 down together.**

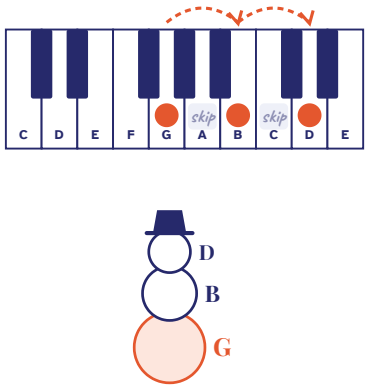

That is the C chord. Slide your hand to any white key and do it again: the cake shape always works.

GAME

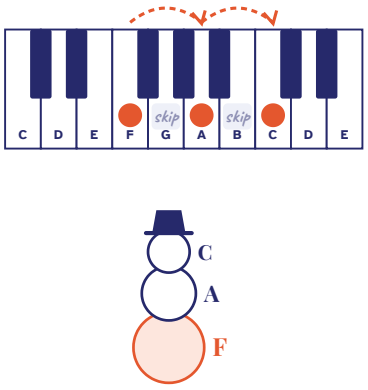

## Build one yourself

**G**

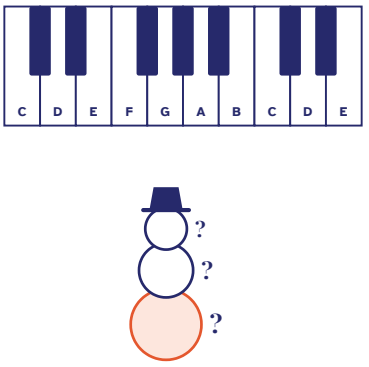

Start on G: **G B D**.

**F**

Start on F: **F A C**.

**?**

Your turn: start on **A**. Which three keys?

Build the cake on A: play one, skip one, play one, skip one, play one.

Answer: A C E: the triad on A.

YOU KNOW THIS

## The Blue Danube (Johann Strauss II), here in C

The most famous waltz tune simply climbs the **C triad**: **C, C E G, G**. Root, 3rd, 5th, then it holds the top: that is why it sounds so open.

**Try it.** Play C E G one at a time, then hum the waltz over it.

THINK OF IT Solid: three friends shout “Hello!” together. Broken: each says it in turn.

TRAP

- × Stacking 2nds or 4ths: a triad skips exactly one letter each time.
- × Naming a chord from its top note: the root names it (at the bottom when the notes are stacked in 3rds).
